Sound

1) The form of energy that creates the sensation of hearing is..... (sound, light, heat)
Answer Hint
Sound

2) Sound is produced by the ..... of objects.
(motion, conduction, oscillation, vibration)
Answer Hint
Vibration

3) Objects that produce sound are called .....
(sources of sound, sources of energy, sources, sources of water)
Answer Hint
Sources of sound

4) When we speak, sound is produced when the ..... in the voice box vibrate.
(eardrum, vocal cords, ear cup, air)
Answer Hint
Vocal cords

5) The part that vibrates when a bee makes a sound is ..... (wing, vocal cords, muscles, legs)
Answer Hint
wing

6) Sound cannot travel through .....
(vacuum, solid medium, medium, liquid medium)
Answer Hint
vacuum

7) When a stretched rubber band is plucked, its motion is .....
(linear motion, oscillation, circular motion, vibratory motion)
Answer Hint
vibratory motion

8) Any ..... can travel not only through gases but also through liquids and solids.
(Sound, light, heat, none of these)
Answer Hint
sound

9) A snake uses sound transmission..... to catch prey. (through the ground, through the air, through a vacuum, through water)
Answer Hint
through the ground

10) The speed of sound in different mediums is .....
(different, the same, increases and decreases by the same quantity, none of these)
Answer Hint
Different

11) The speed of sound is highest when the substance is in a ..... state.
(solid, liquid, gaseous, none of these)
Answer Hint
solid

12) The part of the ear that can vibrate is .....
(ear canal, middle ear, inner ear, eardrum)
Answer Hint
eardrum

13) The ..... sends vibrations to the inner ear. (vocal cords, ear cup, air, eardrum)
Answer Hint
eardrum

14) In every year ..... is celebrated as World Hearing Day.
(March 31, March 3, March 8, March 9)
Answer Hint
March 3

15) A sound that is produced by regular vibrations and is pleasant to hear is called .....
(noise, pitch, loudness, music)
Answer Hint
music

16) List two situations where sound is useful in life.
Answer Hint
- Communication
- To escape from danger

17) How is sound produced? Write a definition for sound.

18) Which part vibrates primarily when the following musical instruments are played?
a)Flute b) Mridangam
Answer Hint
a) Air b) Leather

19) The main part that vibrates when musical instruments like the veena and violin are played is the strings. Along with the strings, list the other parts that vibrate.
Answer Hint
Wooden frame, air

20) Find out and write which part of the body of the following creatures vibrates primarily when they make a sound.

a)Cricket b) Cuckoo
Answer Hint
a) Wings b) Vocal cords

21) Why do astronauts have to use radio systems to talk to each other?
Answer Hint
Sound needs a medium to travel. Since there is no air in space, they use radio systems.

22) Through which medium do the following creatures use sound transmission for various purposes?
a) Snake b) Dolphin
Answer Hint
a) Sound transmission through the ground
b) Sound transmission through seawater

23) Even though lightning and thunder occur at the same time, we hear the thunder after seeing the lightning. Why?

24) List two problems faced by people who are audio impaired

25) What kind of approach should be taken towards people who are audio impaired ? (Mention any two)

26) Write the names of two people who have overcome hearing impairment and achieved success in life.

27) a) Which instrument is used for hearing tests?
Write the name of an electronic device that helps create a hearing experience.

28) What is the difference between a musical note and noise?

29) Who are the people who experience the most harm from noise pollution?

30) Write the names of two devices used to protect the ears.

31) Describe an experiment to prove that sound is produced by vibration.

32) Explain how musical notes are produced from a nagaswaram, flute, and a leaf flute.
Answer Hint
Nagaswaram,:reeds
leaf flute : reeds;
Flute: air

33) Prove that sound can be transmitted through liquids also.

34) Explain how sound travels through air.

35) What are the causes of noise pollution?

36) What is meant by sound pollution? What are the measures that can be taken to reduce sound pollution?

37) Describe an experiment to prove that sound needs a material medium to travel.

38) Prove that sound can travel through solids, liquids, and gases .

39) Why is the song of two people who can produce sound at the same frequency not equally enjoyable?

40) When someone is washing clothes far away, we hear the sound of the cloth hitting the stone after the cloth is lifted from the stone. Explain why it is so .

Bio-vision
