	processing • Can be reused • It will be easier to use	
	Answer the questions 30 and 31 in detail. Each carries 5 score. (2 x5=10)	
30	(A).Compare the life of the people in the Palaeolithic and Neolithic periods Human life in Palaeolithic Age $ Lived in caves and open spaces. $ Hunting and gathering were the means of livelihood. $ Bands were the basic units of society. $ Men were engaged in hunting and women, in gathering. $Food was not stored. $ Nomadic life prevailed. Human life in Palaeolithic Age ✪ Humans begun agriculture and domestication of animals ✪ Settlements and agricultural villages grew up ✪ The society shifted from agricultural activities to other occupations such as pottery and weaving. ✪ The manufacture of clay pots and the use of bricks made grain storage possible ✪ Society has become composed of various occupational groups. B. Explain the factors that led to the growth of Magadha @ Magadha was a fertile region with good rainfall. @ Large deposits of iron ore. @ The iron needed for tools and weapons was readily available. @ Elephants were an important factor in wars in those days. @ Elephants were available in large numbers in the forests of Magadha. @ This ensured Magadhan victory in battles. @ The Ganga and its tributaries provided easy transportation of goods.	5
31	A. ompare Kashmir Himalaya and Himachal Himalaya on the basis of hints given Hints: Location, Rivers, Mountain, Mountain pass, Tourist places	5

Kashmir Himalaya	$The Kashmir Himalaya include in western himalaya. $River Indus and its tributaries, such as Ravi, Jhelum and Chenab $ Karakoram, Zaskar, Ladakh and Pir Panjal. $Banihal Pass across the Pir- Panjal Range that connects Jammu with the Kashmir Valley $Dal Lake, Sonmarg and Gulmarg,Laddak
Himachal Himalaya	$ Include in western himalaya. $ Chenab, Ravi and Beas are the important rivers in this mountainous region

Summative Assessment_Term I Answer Key 9 EM

	$ Dhowladhar and Pir Panjal are the mountain ranges in this region. $ The Baralacha La Pass that connects Himachal Pradesh with Ladakh and Rohtang Pass that connects Kulu Valley with Lahul and Spiti Valleys are the important passes in Himachal Himalaya. $ Beautiful valleys such as Kulu. Kangra and Lahul and tourist centres such as Shimla, and Manali attract numerous tourists

Or

(B)How do rivers create depositional landforms? Explain the formation of Sindhu-Ganga-Brahmaputra plains based on this

₩ Rivers originating from high altitudes transport sediments down the stream and deposit them in low-lying areas creates depositional landforms, expansive alluvial plains.

Eg: Indo-Gangetic-Brahmaputra plain

₩ The fertile Indo-Gangetic-Brahmaputra plain was formed in the same way by the deposition of sediments carried by rivers.

₩ The sediments are deposited in a vast depression at the south of the Himalayas which was formed as a result of the formation of the Himalayas.

₩The sediments, transported by rivers originating from both the Himalayas and Peninsular India, were deposited in this expansive depression, which led to the formation of the plain.

₩ The continuous depositional processes over millions of years have contributed to the evolution of this fertile plain.

₩ The average depth of alluvial deposits in this plain ranges from 1000 metres to 2000 metres.
