13	ldentify the geographical division marked as A in the given picture and write its features. A- Terai. Marshy and swampy tract.Approximately 10 to 20 km wide.Running parallel to the Bhabar belt.The rivers that disappear in the Bhabar region re-emerge in this area.	2
14	What do you meant by 'status' in social system? Status refers to an individual's position within the social system. Status plays a significant role in determining how an individual is perceived and treated within a social system. Every society categorises its members based on their status, leading to social stratification. Thus, individuals are defined as high status or low status individuals in the society.	2
15	A.Mention the list which includes local self government as per the seventh schedule of the Indian Constitution. Write down the features of this list.	2

	State List - * List of subjects over which State governments have legislative powers in normal circumstances. * Initially, it had 66 subjects.* Example – Agriculture, Jails, Police, Local Government, etc. OR B.What are the powers and functions of the Primne Minister of India as the admin istrative head of the country The administrative head of the country.Forms the Council of Ministers and decides the members of his/her Cabinet. The power to change the portfolios of ministers and to include or remove members from the Council of Ministers.Acts as the link between the President, the Cabinet and the Parliament.	
Answer the questions 16 to 23 in three or more sentences.Each carries 3 score 8x3= 24		
16	Explain the importance of the village autonomy of the Cholas Many records of the time give evidence regarding Village self-governance under then Cholas.The most important among them is the Uttharamaerur Inscription. Two types of Councils called "Ur' and 'Sabha' existed during that period. They had autonomous power.The maintenance of ponds, wells and roads was the responsibility of the local administrative bodies. The growth of feudalism constrained the activities of these local bodies. OR Temples played an important role in the socio-economic life of the Chola kingdom. Evaluate the statement ● The temples of that period were also very rich. ● The rich exchequer inspired the kings to build temples. ● Educational institutions and hospitals functioned along with temples. ●A large number of people were employed in connection with the ●construction and maintenance of the temples.Artisans and craftsmen depended on the temples for their livelihood.	3
17	Differentiate sex and gender Sex: Biological characteristics that define males and females. Difference between males and females in chromosomes, physical structures, hormones, genitalia, and other physical Gender: Social, cultural and psychological characteristics associated with the categories of male and female through particular social contexts. Neither biological nor constant Acquired and strengthened	3

	factors. Ascribed status.	through social intervention Social construct Achieved status	
18	Elucidate the features of the Market Control implemented by Alauddin Khalji during the Sultanate period Its objective was to control the prices of all products in general and the price of the foodstuff in particular. He was forced to make such a reform because of his concern that a large army would require huge sum of money to be paid as salary. If the price of products is low, it is enough to pay low salary. As part of this, he established warehouses and punished those who charged higher prices and the hoarders.	3
19	Eventhough the coastal area has several conditions to its advantage, coastal area and its people are facing many challenges Coastal region has many potentials like topography suitable for settlements, pleasant climate, availability of water, agriculture, and industries. Even though it has several conditions to its advantage, coastal area and its people are facing many challenges. Natural disasters like Tsunami and cyclone, sea level rise due to global climate change, coastal erosion and sea turbulence make the life of the coastal people challenging. People living in coastal regions are constantly striving to adapt their social life to such adverse conditions of nature.	3
20	Mention the general characteristics of market. Goods are being sold. There are people who buy goods (buyers). There will be buyers and sellers of products The price of goods is determined There is an opportunity to select goods There will be marketing techniques	3
21	A.Along with cxtensive powers, the Gupta kings had some responsibilities as well. Analyse the statement. * Protect the people from aggressions * Protect Brahmins, Sramanas (Buddhist/ Jain monks) and the weaker sections * Administration of justice OR B.Caste system became more complex during the Gupta Period. Substantiate the statement	3

	• Various occupational groups (Srenis) were formed• Formation of a number of sub-divisions in the society. • Impossible for the existing varna system to accommodate all these new occupational groups. • Each occupational group became a new 'jati' or 'upajati'. • People who came from outside the subcontinent, the forest dwellers ('Nishadas') and children born of inter-caste marriages also formed new 'jatis'. • Evolved complex caste system • No change in the position and privileges of the Brahmins, Kshatriyas and Vaisyas in the new complex system.	
22	Peninsular Plateau is the storehouse of minerals. Substantiate the statement. Yes, Especially the Chota Nagpur Plateau Situated at the south of Rajmahal Hills. Richest store house of minerals.Metallic minerals such as iron ore, bauxite, manganese and copper and non - metallic minerals such as lime stone and coal make this region mineral rich.The major economic activities in this region are mining and mineral-based industries.Minerals like lime, iron, magnesium and aluminium are characteristics of regur soil in the Plateau	3
23	Explain the contributions of the Chalukyas to the temple architecture. The Chalukyas built several temples.In the beginning, they constructed rock-cut temples but later shifted to structured temples.The Megutti JainaTemple of Aihole in Karnataka,and the Virupaksha Temple of Pattadakkal are examples of the structural temples of the Chalukyas. Carvings can be seen on the pillars that support the roof of the temple. They reflected the Dravidian style . Its main feature was the use of rock-cut stone for construction. Plenty of rocks were obtained from the Western Ghats and Deccan Plateau. Skilful sculptors carved beautiful temples out of natural rocks.	3
Answer the questions 24 to 29 in four or more sentences.Each carries 4 score (6x4= 24)		
24	A. Elucidate the role of land breeze and sea breeze in moderating the coastal weather It does not experience too hot or too cold a condition here. This is due to the maritime effect by the proximity to the sea. ◎ Land and sea respond differently to the insolation. Land gets heated and cools quickly, while ocean gets warm and also cools slowly. This results in the formation of land and sea breeze. These winds play a major role in moderating the coastal weather.	4

	<table><tr><th>Sea Breeze</th><th>Land Breeze</th></tr><tr><td>During day time the air above the land rises up due to high heat and develops low pressure Sea is comparatively cooler than the land and a high pressure is developed Air blows from the high pressure(sea) to the low-pressure area of land</td><td>During night time high pressure develops over the land. Sea is relatively warmer than the land, it will develop low pressure Wind blows from the high-pressure area of land to the low pressure area of the sea.</td></tr></table> OR Elucidate the role of monsoon winds in providing rainfall to the coastal regions of India. Monsoon winds is another factor influencing the coastal climate. It is the Southwest monsoon winds that give rainfall all over India. Monsoon winds reach islands and coasts first. Southwest monsoon winds coming through Arabian Sea hits the Western Ghats and give high amount of rainfall in the Western coastal plains. ⊙ Eastern coast especially the Coromandel coast, receives rainfall during the months of October and November. This is the season of retreat of monsoon winds. ⊙ During this season Kerala also receives some rain. It is called "Thulavarsham' in Kerala. ⊙ Eastern coast also receives rainfall from cyclones developed in the Bay of Bengal.	
25	Analyse the graph given below and explain its features. Quantity supplied is marked along the OX axis and different price levels are marked along the OY axis. The points a, b, c, d and e indicate the quantity supplied of the product at different price levels. The supply curve SS is obtained by joining these points. The supply curve moves upwards from bottom left to top right. This shows the direct relationship between quantity supplied and its price.	4
26	Mark and label the geo-information mentioned below in the outline map of India provided. India.	

	 a.The island group which includes the Barren Island, the only active volcano in - Andaman & Nicobar Islands b.The division of the western coastal region where the Mormugao harbour is- Konkan Coast c.The division of the Western Coastal Plain where the union territory of Dadra and Nagar Haveli is situated - Gujrat Coast d. The coastal division which includes the National Waterway (NW-3) from Kottapuram to Kollam.- Malabar coast	
27	A.Language is one of the factors that strengthen gender stereotypes. Substantiate the statement The nouns in many languages are classified on the basis of gender. ⊙ The words and usages that are used to refer to areas that were once monopolised by men continue to be used in this way. ⊙ The repeated usage of such terms reinforces stereotypes.We can defend the	4

	reinforcement of such language stereotypes through Gender-inclusive terms and usages like Teacher,Engineer,Nurse,Driver,Advocate OR B.Evaluate the role played by advertisements in strengthening gender stereotypes. Gender stereotypes in advertising reinforce traditional, often limiting, roles such as such as women are suitable to something and men are more suitable to somethings.Some examples are Generally Women: Dishwashing implements, Cosmetics, Utensils, stove and tools used in kitchen, Financial institutions Generally men: Bikes and cars, Sports products, Cement	
28	Elucidate internal migration and international migration with suitable examples. Migration -is the permanent or temporary settlement of people from one region to another. There are two types of migration. .Internal migration -migration within a countries border. Eg people of Kerala going to other states. .International migration -migration across country borders. Eg Movement of people from India to gulf countries	4
29	How are sand dunes formed? What are the different types of sand dunes found in Thar Desert? When the velocity of the wind decreases or the movement of the wind is checked, the sand grains carried away by the wind are deposited. These deposited sand grains gradually pile up and form various depositional landforms of different sizes and shapes. These landforms are Sand dunes Barchans Parabolic sand dunes Sief dunes Longitudinal dunes Linear sand dunes Transverse dunes	4

Answer the questions 30 to 31 in detail. Each carries 5 score(2x5= 10)		
30	A.Give an account on the coastal regions of India based on the following hints **Human life** Factors such as equitable climate, plains suitable for agriculture and the development of transportation, employment opportunities like agriculture, fishing, tourism, availability of water, mineral deposits and industries make the coastal plain densely populated. Apart from Delhi, three metro cities of India (Mumbai, Chennai and Kolkota) had developed on the coastal plains. Lakshadweep Islands have higher density of population than the national average but in the Andaman and Nicobar Islands the population density is low. **Economic Activities** Agriculture and fishing are the main economic activities of people living in the coastal region. There are various mineral-based industries, ship building, fish processing and salt manufacturing industries in coastal regions.Tourism is an important employment sector in the coastal region .It has a great potential and is expanding day by day.Ports play an important role in the economic development of a coastal region. Exports and imports of industrial products and raw materials are carried out through the ports. OR B. Write a description on the soil types and vegetation of the coastal regions of India. Gujarat Coast -Black soil, Coastal alluvial soil, Saline soil Konkan Coast -Black soil, Laterite soil Malabar Coast- Alluvial soil, Peat soil Eastern Coast- Coastal Alluvial soil, Delta alluvial soil Lakshadweep -Coral sandy soil Andaman & Nicobar Island -Marine sandy soil and Alluvial soil **Dry coastal vegetation** * Sandy strand vegetation * Rocky strand vegetation **Wet coastal vegetation** * Mangroves * Salt marsh plants	5

	* Sea weed * Sea grass * Coral plants	
31	A.Analyse the socio- economic life of the people of India during the Sultanate period. Society in Sultanate period- was full of several inequalities. The Sultan, chief nobles, village chiefs called Muqdams, and lower nobles led their lives in high standards.Most of the people in the cities and villages underwent several sufferings. The existing social structure based on caste system did not undergo any fundamental changes. some changes in the status of women. The caste system did not limit the interaction between the Hindus and the Muslims Economic life in Sultanate Period- Agricultural progress, administrative stability, transport progress, growth of trade, growth of cities, emergence of money economy, industries and handicrafts . OR B.Analyse the contributions of the agricultural sector in the economy of the Chola Kingdom. Activities taken by the rulers of Chola kingdom for agricultural development. ● Tax concessions given for the development of agriculture ● Encouraged to bring barren land under cultivation. ● By donating land to temples and Brahmins, it became possible to expand agriculture to a larger area. Also they done many things for agriculture. Constructed different irrigation facilities. Ponds, tanks, canals and wells. In addition to this, bunds were constructed across the rivers and the water thus collected was distributed to different parts of the country through canals. Huge ponds were built in areas where there were no natural streams, and rainwater was collected in them during the rainy season. These water reservoirs that were protected from going dry were called 'Erippatti.	5
