Std IX SOCIAL SCIENCE ANNUAL EXAM
POSSIBLE QUESTION ANSWERS

PRICE AND MARKET

1.What do you mean by 'Inputs" in the production process? Write any two examples for Inputs.

Inputs-Factors which are used in the production process are called inputs
Examples-Land, Organisation,Buildings,Machines,Raw materials,Capital,Fuel

Fixed Inputs.

⊙ It is not possible to change the quantity of all inputs within a short period. Such inputs which can not be changed in a short period of time are called fixed Inputs.
For eg :Land, Capital

2.Variable inputs.

⊙ The quantity of input that can be changed within a short period of time are called variable inputs.
For eg : Labour ,Raw materils

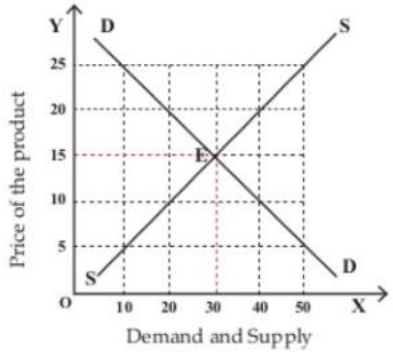

3.Digital Marketing

⊙ Marketing of goods and services with the help of digital channels by using information technology is called digital marketing.

Features

⊙ It is an advanced digital system that uses the internet extensively.
⊙ Consumers started selecting and buying products according to their needs,
⊙ Products can be selected from any part of the world ⊙ The market become more extensive
⊙ Consumers do not need to visit the market place. ⊙ Saves time ,diverse products ,attractive .
⊙ Create new job opportunities .

4.Observe the graph and answer the following questions

⊙ What do the DD and SS curves indicate?
⊙ DD indicates the quantity of the product demanded ans SS indicates the

POSSIBLE QUESTION ANSWERS VIMAL

quantity of the Product supplied
⊙What are the equilibrium price and the equilibrium quantity at Point E?
At point E the equilibrium price is Rs 15 and the equilibrium supply 30
⊙ Is there any other situation at which demand and supply are equal in the figure?
The demand and supply are not equal at any other points
5.Equilibrium.
⊙ The condition in which demand and supply are equal is called equilibrium.
Equilibrium quantity.
⊙ Price at which demand and supply are equal is called equilibrium price and the determined quantity is called equilibrium quantity.
6.In what ways can the development activities be made possible by minimising such environmental problems. Discuss and consolidate your suggestions ?
⊙ Adopt scientific land use practices ⊙ Design buildings and other developments using eco-friendly and recyclable materials ⊙ Encourage terraced farming on hillsides
⊙ Use renewable energy resources ⊙ Waste management ⊙ Water conservation
⊙ Use modern transport systems ⊙ Control of noise pollution
7.Sustainable Development Goals
⊙ The collection of 17 goals set by the United Nations is known as sustainable development goals. ⊙ The United Nations aims to achieve these goals (which were announced in 2015) by the year of 2030 ⊙ Sustainable development goals set forth a model for everyone to achieve a better and sustainable future.
8.Development activities are essential for the progress of the society. But what may be the impact of such activities on the environment and living creatures, including humans? Write them.
⊙ Adversely affects the local climate. ⊙ Food shortage ⊙ Water pollution ⊙ Air pollution
⊙ Harm to water resources ⊙ Natural disasters ⊙ Soil degradation
9.Sustainable Development-⊙ Development activities aiming at the economic growth and progress of the nation lead to exploitation of natural resources and destruction of environment.⊙ Development activities lead to economic development of the country and
favourable changes in the standard of living of the people. At the same time
they may cause various socio, ecological problems too
10.The changes in your surroundings due to development activities
⊙ Rocks and hills are levelled for constructing buildings, roads etc.⊙ Fields are levelled and buildings are constructed .⊙ Natural forest lands is cleared .⊙ Renovating old roads and building new roads results in soil erosion and environmental degradation ⊙ Noise and air pollution may increase .
11.What may be the factors ,other than one,s income that influence consumption ?
Price, Quality Climate, Taste and preferences of consumer, Demand
12.Diff erentiate Demand and Supply.

POSSIBLE QUESTION ANSWERS VINAI

Demand: The willingness and ability to purchase a product at a certain price.
• Supply: The quantity of a product made available for sale at a specifi c price during a given time

Along the Coasts

1.The Western coastal plain can be divided in to three. They are
⊙ Gujarat Coast ⊙ Konkan Coast ⊙ Malabar Cost
2.The Eastern coastal plain can be divided in to three. They are
➔Northern Circas ➔Coromandel Coast
3.The landforms produced by erosions
Cliffs.-When sea waves hit continuously against the rocks in coasts, coastal rocks are removed by erosion. As a result, steep land surfaces are formed. Such landforms are called cliffs.
Sea caves.-As a result of erosional process by waves, small holes develop in the coastal rocks. These holes get enlarged over a period of time and forms the sea caves.
Sea arch- Due to wave erosion, sea caves develop from both the sides of coastal rock that protrudes into the sea. As the erosion continues, both the caves subsequently merge to form an arch shaped landforms.
Sea stack.-When the roof of a sea arch collapses through continued erosion, then the seaward part of the arch stands detached from the shore and remains as a pillar. This is called the sea stack.
4.Depositional landforms
Beaches- ⊙ Beaches are the temporary deposits of sand and gravel deposited between the limits of the high tides and low tides by the action of waves.
Sand bars ⊙ Sand bars are the temporary embankments of sand deposited parallel to the coast waves.
spit-⊙ The sand bar that extends from land to sea is called spit.
5.Climate-⊙ Coastal regions experience unique climate unlike other physiographic regions.
⊙ Although they belong to the Tropical Zone, the coastal regions of India have a moderate climate. ⊙ It does not experience too hot or too cold a condition here. This is due to the maritime effect by the proximity to the sea. ⊙ Land and sea respond differently to the insolation. Land gets heated and cools quickly, while ocean gets warm and also cools slowly. This results in the formation of land and sea breeze. These winds play a major role in moderating the Coastal weather.Monsoon winds is another factor influencing the
coastal climate. It is the Southwest monsoon winds that give rainfall all over India. Monsoon
winds reach islands and coasts first. Southwest monsoon winds coming through Arabian Sea hits the Western Ghats and give high amount of rainfall in the Western coastal plains.

POSSIBLE QUESTION ANSWERS VMAL

⊙ Eastern coast especially the Coromandel coast, receives rainfall during the months of October and November. This is the season of retreat of monsoon winds.⊙ During this season Kerala also receives some rain. It is called "Thulavarsham' in Kerala.⊙ Eastern coast also receives rainfall from cyclones developed in the Bay of Bengal.

6.Why alluvial deposition is less in western coast?

West flowing peninsular rivers are comparitively smaller than east flowing peninsular rivers.Also steep slope of western ghats intensifies the velocity of West flowing peninsular rivers .It prevents the huge amount of alluvial deposition

7.Northern Circas-Extends from Mahanadi Delta to Krishna Delta It includes the coastal areas of Odisha and Andhra Pradesh. It is known as Utkal Plain in Odisha and Andhra

Plain in Andhra Pradesh. This plain mainly consists of deltaic deposits by rivers such as Mahanadi,Godavari and Krishna. Chilka Lake located South of Mahanadi delta is one of the largest lakes in India. Kolleru Lake in Andhra Pradesh is another important lake on the Circar coast.Ports are less in the Eastern coast.Vishakhapatanam and Masulipatanam are

the major ports. Rice fields such as Srikakulam, East Godavari and West Godavari, fishing harbours of Vishakhapatanam and Masulipatanam stand tall as the centres of economic activity of the coastal population.

8.Malabar Coast-⊙ Stretching from Mangalore to Kanyakumari is about 580 km long.

⊙ This coast is wider than the Konkan coast. ⊙ Coastal landforms such as cliffs, sea stacks, beaches, estuaries and sand bars are also seen in malabar coast. ⊙ Another feature of this coast is the kayal (backwaters). : For eg Vembanad Lake ⊙ Here backwaters and lakes are inter-linked by canals to facilitate water transport. For eg : National Waterways of India (NW3) from Kottapuram to Kollam.In areas like Varkala, Ezhimala, and Bekal, the coast is found elevated. Landforms like cliffs are also seen here. Beaches such as Muzhuppilangad, Chavakkad and Kovalam attract a large number of tourists. Generally coastal wetlands and backwaters are breeding grounds for migratory birds. Bird sanctuaries such as Kadalundi, Kumarakom and Pathiramanal are shelters for migratory birds. Rice fields of Nanjinad, Kuttanad and Kole Lands etc and fishing harbours like Neendakara,

Munambam, Ponnani and Baypore are the centres of economic activities

9.Eastern Coastal Plain

⊙ Relatively wider coastal area lying between the Eastern Ghats and the Bay of Bengal. ⊙ Extends from Mahanadi delta region to Kanyakumari having length about 1800 km ⊙ Formed as a result of the depositionalprocesses by peninsular rivers like Mahanadi, Godavari, Krishna and Kaveri. ⊙ It is an Emerged Coast. ⊙ This coastal plain consists of the deltas of Mahanadi, Godavari, Krishna and Kaveri rivers.The Eastern coastal plain can be divided in to two. They are Northern Circas .Coromandel Coast

POSSIBLE QUESTION ANSWERS VIVA

10.Western Coastal Plain-⊙ The Western coastal plain is a narrow strip of land lying between the peninsular plateau and Arabian sea. ⊙ This coastal plain stretching from Kachchh in Gujarat to Kanyakumari ⊙ Its lenth is about 1840 km, having width between 10 and 15 kms.
⊙ It is a submerged coast. ⊙ The backwaters which are also called Kayals ,found along the coasts of the Western coastal plain.
11. Konkan Coast
Coastal plain that stretches from Daman to Goa located at the South of Gujarat coastal plain is the Konkan coast. Its length is about 500 km.
The coastal plain here is narrower in width as the Western Ghats runs parallel to the coast.The northern part of Konkan coast is sandy and southern part is rocky. Coastal landforms like cliff s, islands and beaches are found here. Goa, one of the major tourist destinations in India, has many beaches. Humid climate with abundant rainfall makes the Konkan coastal plain rich in biodiversity. Natural harbours such as Nhavasheva (Navi Mumbai), Mormugao, fi shing harbour of Malpe, shipyards, tourism centres and industrial centres make the Konkan coast a vibrant area of economic activities.
12.Bio diversity conservation centres of Coromandel Coast
Bird sanctuaries like PulikatLake, Point Calimere and Mangroves of Pichavaram are some centres of biodiversity found along this coastal plain
13.Northern Circas-Extends from Mahanadi Delta to Krishna Delta It includes the coastal areas of Odisha and Andhra Pradesh. It is known as Utkal Plain in Odisha and Andhra Plain in Andhra Pradesh. This plain mainly consists of deltaic deposits by rivers such as Mahanadi,Godavari and Krishna. Chilka Lake located South of Mahanadi delta is
one of the largest lakes in India. Kolleru Lake in Andhra Pradesh is another important lake on the Circar coast.
14.write a short note about Andaman Nicobar Islands
• Located in the Bay of Bengal
• Includes Barren Island, the only active volcano in
India, located in Nicobar
• Capital: Port Blair
15.Write an essay on the topic " Challenges faced by the Indian
costal region and its solutions.
Coastal region has many potentials like topography suitable for settlements, pleasant climate, availability of water, agriculture, and industries.
Even though it has several conditions to its advantage, coastal area and its people are facing many challenges.
Natural disasters like Tsunami and cyclone, sea level rise due to global climate change, coastal erosion and sea turbulence make the life of the coastal people challenging.
People living in coastal regions are constantly striving to adapt their social life to

POSSIBLE QUESTION ANSWERS VIVA

such adverse conditions of nature.

Issues related to climate change in the coastal area and the possibility of natural disasters need to be monitored.

For this it is necessary to enforce timely warning and preparedness with the participation of local community, taking advantage of modern scientifi c technology.

Appropriate resource planning and conservation strategy is necessary for sustainable utilisation of coastal resources and to get its benefi ts to the local people.

Sustainable development is possible only when each of us joins hands together in such activities

16.Coromandel coast

It is the coastal plain extending from Krishna river delta to Kanyakumari.

Kaveri river delta is also part of this plain. The fertile deltaic alluvium makes this region suitable for rice cultivation. Pulikat Lake is one of the important lakes of Coromandel coast. India's rocket launching station Sriharikota, is located on the shores of Pulikat Lake. Bird sancturies like Pulikat Lake, Point Calimere and Mangroves of Pichavaram are some centres of biodiversity found along this coastal plain

17.Explain the human life of Lakshadweep based on occupation and tourism.

Occupation

⊙ Fishing is the major occupation and the main fish caught is tuna ⊙ Coconut is the main agricultural crop. ⊙ Copra (dried coconut) making and coir making are two other traditional
occupations along with fishing.

Tourism.

⊙ The fast growing tourism is developing as a modern occupational sector taking advantages of the lagoons, beaches and coral reefs.

⊙ Adventure tourism such as scuba diving is also an upcoming job sector.

POSSIBLE QUESTION ANSWERS VIMAL

.From the land of Chola to Delhi

1.Activities taken by the rulers of Chola kingdom for agricultural development.

- Tax concessions given for the development of agriculture
- Encouraged to bring barren land under cultivation.
- By donating land to temples and Brahmins, it became possible to expand agriculture to a larger area.

2.Evaluate the activities taken by the rulers of Chola kingdom for agricultural development.

Constructed different irrigation facilities. Ponds, tanks, canals and wells. In addition to this, bunds were constructed across the rivers and the water thus collected was distributed to different parts of the country through canals. Huge ponds were built

in areas where there were no natural streams, and rainwater was collected in them during the rainy season.
These water reservoirs that were protected from going dry were called 'Erippatti.
3.Analyze agricultural surplus influenced commercial progress of Chola dynasty.
The surplus generated through agricultural progress leads to the development of trade. Several products were sold out in the local markets. Pearl and coral were collected from the seashores and exported to foreign countries. Sugarcane was also an important commercial product. Weaving was an important industry. Quality textile items were exported to north India and other parts. Apart from agriculture, metal work was also developed.
4.Temples played an important role in the socio-economic life of the Chola kingdom. Evaluate the statement
● The temples of that period were also very rich. ● The rich exchequer inspired the kings to build temples. ● Educational institutions and hospitals functioned along with temples. ●A large number of people were employed in connection with the ●construction and maintenance of the temples.Artisans and craftsmen depended on the temples for their livelihood.
5.The role played by the Cholas in spreading the Tamil language and the culture of south India to southeast Asia, and their impact on the life of the people of southeast Asia In Sri Lanka, Cholas established their political domination in addition to trade relations. The Chola inscriptions as well as the Sri Lankan literary works like Mahavamsa and Choolavamsa confirm this. In addition to traders, the Buddhist and Hindu sages and scholars also
travelled frequently from Cholanadu to Sumatra, Java and Malaysia. These travels resulted in the spread of language, religion, ideas, and architecture of the Chola kingdom in those lands

5. Chola Village Autonomy

UR------ASSEMBLY OF PEOPLE

SABHA-----ASSEMBLY OF ELDERS IN BRAHMIN VILLAGE

POSSIBLE QUESTION ANSWERS VIMAL

6.Temple at Vatapi (Karnataka),Virupaksha Temple – Pattadakkal,Megutti Jaina temple of Aihole in Karnataka
Ellora Temple Ellora
Lodi Gardens-Sultanate period
Haus Khas Complex-Sultanate period
6.Salient features of Alauddin Khalji's administrative reform of market regulation
Its objective was to control the prices of all products in general and the price of the foodstuff in particular. He was forced to make such a reform because of his concern that a large army would require huge sum of money to be paid as salary. If the price

of products is low, it is enough to pay low salary. As part of this, he established warehouses and punished those
who charged higher prices and the hoarders.
6.Explain how the agricultural progress during the reign of the Delhi Sultans influenced the country's economy?
.Progress in agriculture during the Sultanate period
The Moroccan Traveler , Ibn Batuta opined that the fertile soil of India
suitable for agriculture. ⊙ He visited India in the fourteenth century He has recorded Cultivation was done twice or thrice a year.The majority of the population was farmers.
Sugarcane, wheat, indigo, cotton, oil seeds, fruits and flowers were
cultivated. This led to the development of crafts like oil making, jaggery making, weaving and colouring of textiles. ‘ Rahat Irrigation system’ existed. Agricultural prosperity leads to the development of trade
Growth of trade during the Sultanate period-In addition to the growth in agriculture, administrative stability, improvement in the transportation system and a monetary system
based on Tanka (Silver) and Dirham (Copper) contributed to the growth of trade. Exports and imports got strengthened. In India there were more exports than imports. Gold and silver had flowed into India during that period.
Both exports and imports got strengthened. Soft silk, glass, horses, Chinese
vessels, ⊙ ivory and spices were imported from different countries ⊙ Gold and silver had flowed into India during that period ⊙ Lahore, Multan and Lucknow were busy towns
⊙ The nobles collected the land revenue from these iqtas and gave it to the
Sultan ⊙ The collection of tax in cash led to the emergence of cash economy and thereby paved the way for the massive economic growth.
7.Society in Sultanate period- was full of several inequalities. The Sultan, chief nobles, village chiefs called Muqdams, and lower nobles led their lives in high standards.Most of the people in the cities and villages underwent several sufferings. The existing social structure based on caste system did not undergo any fundamental changes. some changes in the status of women.
The caste system did not limit the interaction between the Hindus and the Muslims
8.Compare the characteristics of Chola-Chalukya rule

characteristics of Administration	Chola	Chalukya
Centralized Administration	Existed	Not existed
Samanta Rule	Existed	Not existed
Local Administration	Existed	Not existed
Influence of the Temples	Existed	Not existed

POSSIBLE QUESTION ANSWERS VIMAL

9.Explain the progress made in the fi eld of art and literature during the reign of the Pratiharas

Art and literature were encouraged. Rajasekharan, a Sanskrit poet, dramatist and author of Kavyamimamsa and Karpuramanjari, lived during this period. Many beautiful temples and buildings were built.Scholars from India were sent as diplomatic envoys to the Caliph's palace in Baghdad.

Indian science and mathematics were popularized in the Arab world. The exchange of Arab products and the movement of scholars took place during this period, preferably in India and Western Asia.

10.Economic life in Sultanate Period- Agricultural progress, administrative stability, transport progress, growth of trade, growth of cities, emergence of money economy, industries and handicrafts .

Social Life-A society full of inequalities, economic inequality, miseries of common people, social structure based on caste system, change in status of women.

Towards a Gender nuetral society

1.Gender Role'-The term 'Gender Role' refers to the societal expectations regarding what men and women should do, think, say and wear, and how they should behave. ➢ Gender Roles represent the specific characteristics, attitude, and actions that a society associates with masculinity and femininity. ➢ For example, some societies hold the idea that men should be the primary breadwinners, while women should manage domestic duties.These roles limit individual choices and potential. A lot of norms and habits are evident in our society based on these gender roles.

2.'Social Norms.' ➔ There are certain norms around us which are unwritten but had existed in a society since time immemorial. They are known as 'Social Norms.' ➔ Social norms are unwritten laws regarding beliefs, behaviours and attitudes that are considered acceptable in a certain social group or culture. ➔ Greeting and thanking individuals are examples of social norms.

3.Sex and Gender

Sex	Gender
Biological characteristics that define males and females. ⊙ Difference between males and females in chromosomes, physical structures, hormones, genitalia, and other physical factors. ⊙ Ascribed status.	⊙ Social, cultural and psychological ⊙ characteristics associated with the categories of male and female through particular social contexts. ⊙ Neither biological nor constant ⊙ Acquired and strengthened through social intervention ⊙ Social construct

POSSIBLE QUESTION ANSWERS VIMAL

	◎ Achieved status

4.Classify the following into laws and Norms

Norms	Laws
Do not waste drinking water Respect the elderly citizens Protect the elderly citizens	Do not physically harass anyone Two-wheeler riders should wear helmets Do not discriminate anyone on the basis of physical features Every individual has the right to legitimate elections Giving and accepting dowry is a crime

5.What do you mean by Trans genders ?

◎ All individuals may not have the gender that the society expects them to have on the basis of their sex. Some people may have gender that does not match their sex. Those who have gender identity different from the socially expected one are called Trans genders

6.Elucidate the gender stereotypes .How are gender stereotypes created? Write examples.

◎ Stereotypes are created by simply presenting such incorrect or partially correct notions as the basic qualities of men and women.eg. women are good as nurses. Men are not fi t for that

7.Gender based Articles in the Constitution

◎ Article 14 of the Constitution of India ensures that all individuals are equal before law.

◎ The Article 15 states that no individual shall be discriminated against based on gender.

◎ Article 16 Equality of opportunity for all genders

◎ Article 21 All genders have the right to dignity, individual liberty and privacy

8.One of the factors that reinforce gender stereotypes is language. Substantiate the statement.

◎ The nouns in many languages are classified on the basis of gender. ◎ The words and usages that are used to refer to areas that were once monopolised by men continue to be used in this way. ◎ The repeated usage of such terms reinforces stereotypes.
