Std IX Social Science
SURE A PLUS NOTES

3.Plateau Where the Earth's history slumbers

1. Write the features of Peninsular Plateau?

₹ Triangular-shaped physiographic unit occupying major share of the Peninsular India .

₹ Average altitude of 600 to 900 metres above mean sea level.

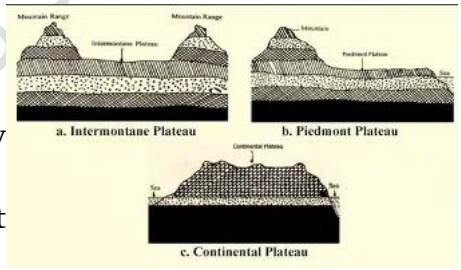

₹Extending over 16 lakh sq.km in area .

₹ Physical diversities such as extensive table lands with bordering mountain ranges and hills, comparatively shallow river valleys and diverse flora and fauna .

₹ Holds the major share of the Peninsular India. One of the oldest landforms in the world.

₹ The largest physical division of India

2.What is a Plateau ? What are three types of plateaus based on their location. (Second Term Exam -2024)

☞ Plateaus are the relatively flat and very extensive landforms situated at comparatively higher elevation from the surroundings.

☞ They are Intermontane plateaus, Piedmont plateaus,Continental plateaus

3.What are the boundaries of the peninsular plateau?

North	Vindhya Ranges
South	Cardamom Hills
West	Western Ghats
East	Eastern Ghats

4.Based on it's location Peninsular plateau can be generally classified into two.What are they?

* The Deccan Plateau
* The Central Highlands

5. Name the hills which form the northern boundary of Deccan Plateau?

Satpura ranges, Maikala ranges and the Mahadeo Hills

6.The Formation of Deccan Plateau Deccan Plateau formed? (Second Term Exam -2025)

¢ 'Dakshin', meaning 'the South'.

¢ The Deccan Plateau is made up of crystalline rocks, like basalt, granite and gneiss, formed by the lava flows millions of years ago.

¢ The north western part of the Deccan Plateau is composed of lava rocks called basalt.

¢ This region is called as Deccan Trap.

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

¢ The black soil; highly fertile and with more water - retaining capacity.
¢ It protects the agricultural crops even in summer.
¢ Also called as black cotton soil, as it is very useful for cotton cultivation.
¢ Minerals like lime, iron, magnesium and aluminium are characteristics of regur soil

7.Elucidate features of Regur soil

✪ The black soil
✪ Highly fertile and with more water - retaining capacity
✪ It protects the agricultural crops even in summer.
✪ Also called as black cotton soil, as it is very useful for cotton cultivation.
✪ Minerals like lime, iron, magnesium and aluminium are characteristics of regur soil.

8.Write a brief note on Western Ghats (Second Term Exam -2025)

◎ Mountain range, extending for about 1600 km from Kanyakumari in the south to the state of Gujarat in the north.
◎ Anamudi (2695 metres) in Kerala(Idukki)the highest peak in Peninsular India.
◎ Anamalai of the Western Ghats

9.Names of Western Ghat ranges in Different states

Anamalai and Elamalai in Kerala,
Nilgiris in Karnataka and Tamilnadu
Sahyadris in Maharashtra

10.Briefly explain Eastern Ghats? (Second Term Model Qn Paper)

₩ The total extent of the Eastern Ghats is about 800 km from the Mahanadi banks in Odisha to the Nilgiri ranges in Tamil Nadu.
₩ The east-flowing peninsular rivers cut across theEastern Ghats, breaking the continuity of these ranges and flow over the eastern coastal plains.
₩ The hill ranges in the Eastern Ghats are Javadi Hills, Palkondamalai, Nallamalai and Mahendragiri.
₩ The Western Ghats and the Eastern Ghats joins at Nilgiri Hills.
₩ Mahanadi, Godavari, Krishna, Kaveri the peninsular rivers cutting across the Eastern Ghats

11.Give a brief account on features of Central Highlands (Second Term Model Qn Paper) or Features of Aavali mountains (Second Term Exam -2025)

€ The extensive plateau region that lies to the north of Satpura ranges.
€ The Aavali mountains are on the western margin of this table land known as Malwa Plateau.
€ The Aravali ranges is an example for old fold mountains or residual mountains worn down by long term erosion.
€ The major hill station in Aravali ranges is Mount Abu
€ Mount Abu the highest peak in Malwa Plateau

12.Write a brief note on Chota Nagpur Plateau

£ Situated at the south of Rajmahal Hills.
£ Richest store house of minerals.
£ Metallic minerals such as iron ore, bauxite, manganese and copper and non - metallic minerals such as lime stone and coal make this region mineral rich.
£ The major economic activities in this region are mining and mineral-based industries

13.Factors Influencing the Climate of Peninsular Plateau (Second Term Model Qn Paper)

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

*Tropical location
* Peculiar shape of the Peninsula
*Distance from the ocean
*Orientation of mountain range
*Direction of Monsoon winds

14.What you termed as rain shadow regions.? (Second Term Model Qn Paper)

@ Moisture-laden winds from the sea rise along the windward sides of mountains.
@ The air rising in this manner condenses to form rain-bearing clouds and causes heavy rainfall along the windward sides.
@ But the leeward sides generally remain rainless as the descending air along these slopes is dry.
@ Such regions are called as rain shadow regions.

15. The rainfall in the interior parts of Tamil Nadu and Karnataka (Second Term Model Qn Paper)during southwest monsoon is very scanty .Evaluate

§ The states are located in the rain shadow region .
§ The Western Ghats blocks the monsoon winds from blowing over these states.

16.The Western Ghats, the mountain ranges of the Central Highlands and the Aravali ranges extending up to the Delhi ridges, divides the peninsular drainage into three. Which are they?

The peninsular rivers flowing eastwards into the Bay of Bengal
The Peninsular rivers flowing westwards into the Arabian Sea.
Rivers that flow northwards to join Yamuna and Ganga.

17. Define the following

Catchment Area: The defined area from where the water flows into a river is termed as the catchment area of the river.

Drainage Basin: The area formed by a river and its tributaries is called a Drainage Basin.

Water Divide: The boundary line separating two watersheds or drainage basins is called Water Divide.

18.Table on west flowing peninsular rivers (Second Term Model Qn Paper)

River	Source and Flowing states	Tributary
Mahanadi	Sihawa in Raipur(Chattisgarh) Chattisgarh, Odisha, Madhya Pradesh	Ib, Tel
Godavari	Nashik in Maharashtra Maharashtra, Madhya Pradesh, Andhra Pradesh	Pranhita, Indravati, Sabari
Krishna	Mahabaleshwar (Maharashtra)	Tungabhadra,Bhima, Koyna
Kaveri	Brahmagiri Hills in Karnataka Maharashtra Bhima, Koyna	Kabani, Bhavani, Amaravati

SURE A PLUS NOTES STD IX SS

Downloaded From: https://textbooksall.blogspot.com/

	Karnataka, AndhraPradesh	

19.Table on west flowing peninsular rivers (Second Term Exam -2024)

River	Source and Flowing states	Tributary
Narmada	Amarkantak (Madhya Pradesh)	Hiran, Banjar
Tapti	Muttai (Madhya Pradesh)	Girna

20. Name the largest peninsular river?

$ Godavari, also called Dakshin Ganga?

21. The water flow in River Kaveri does not experience any significant decrease in flow throughout the year. Why?

@This is due to the fact that the catchment area receives southwest monsoon rains during summer and northeast monsoon rains in winter.

22. From where the west-flowing Peninsular Rivers are originated?

^ Uplands in Central Highlands.

23. Why Narmada stand tall above other peninsular rivers?

> Steep valleys carved in marble rocks, Duandar Waterfalls near Jabalpur and Sardar Sarovar

24.The major rivers that originate from the Western Ghats and flow to the Arabian Sea through Kerala.

< Periyar, Chaliyar, Kadalundi, Muvattupuzha, Pampa, Bharathapuzha, Achankovil, Kallada.

25. Which rivers are called peninsular tributaries of the Ganges?

@ Chambal, Sindh, Betwa, Ken, Son.

26. Which main rivers originate in the highlands of the Malwa plateau and flow northwards to join the Yamuna and Ganges?

To Yamuna: Chambal, Sindh, Betwa

To Ganges: Ken, Son

27.What are Ravines?

$ Gullies formed by the continuous erosion of the Chambal River and its tributaries create badland topography along the northern slopes of the Malwa Plateau, known as Ravines.

28. Peninsular rivers are, in general, not navigable. Why?

- They are seasonal and often dry up during summer.
- They have uneven, rocky river beds with sharp slopes.

SUREA PLUS NOTES STD IX SS

Downloaded From: https://textbooksall.blogspot.com/

29.Multipurpose River Valley Project

Project	RIVER	STATE
Hirakud	Mahanadi	Odisha
Tungabhadra	Tungabhadra (Tributary of Krishna)	Karnataka
Sardar Sarovar	Narmada	Gujarat
Krishna Raja Sagar	Kaveri	Karnataka
Nizam Sagar	Godavari	Andhra Pradesh

30.What are Multipurpose River Valley Projects?

$ Projects that construct dams across a river to serve multiple purposes simultaneously, such as flood control, irrigation, hydroelectric power generation, inland water transport, fishing, and tourism.

31. Major natural vegetation types in the Peninsular Plateau:

Tropical Deciduous Forests-Moist deciduous forests & Dry deciduous forests.

Rainfall- 70 to 200 cm

Type of Vegetation -Teak, Sal, Shisham, Mahua, Sandalwood, Rosewood, Axlewood, Bamboo

Region-Eastern slopes of Western Ghats, Madhya Pradesh, Chhattisgarh, Chota Nagpur

Tropical Thorn Forests-Found in high-temperature areas with short trees

Rainfall-Below 75 cm

Type of Vegetation-Acacia, Euphorbia, Date palms, grasses

Region- Semi-arid regions of Maharashtra, Karnataka (east of Western Ghats), Andhra Pradesh, Telangana, Tamil Nadu

Southern Montane Forests-Temperate vegetation above 1500m; subtropical below

Rainfall-100 to 600 cm

Type of Vegetation- Southern Montane vegetation

Region-Western Ghats, Vindhya ranges, Nilgiri Hills

32.Which is the sub-tropical vegetation seen along the Nilgiris, Palani, and Anamalai?

$ Shola forests.

33. What is the difference between In-situ Soils and Transported Soils?

< In-situ Soils: Formed and remaining directly over their parent rocks (e.g., Black soil).

< Transported Soils: Carried away by agents like wind or water and deposited elsewhere (e.g., Alluvial soil).

34.Tabulate the Soil Types in Peninsular Plateau (Second Term Exam -2024)

Soil	Formation	Features
Black Soil	As a result of weathering of lava rocks called basalt	very fertile and rich in nutrients. suitable for cotton cultivation
Red Soil	As a result of weathering of very old	The red colour is due to the

SUREPLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

	crystalline metamorphic rocks	presence of iron in this soil. It also appears in brown, grey and yellow colours
Laterite Soil	as a result of leaching of minerals such as silica and lime from the soil at places experiencing alternating periods of heavy rain and drought	less fertile,used extensively for plantation crops such as tea, coffee, rubber and arecanut
Mountain Soil	mechanical weathering caused by snow, rain, and temperature variation	suitable for the plantation crops

35.Tabulate the Agriculture in Peninsular Plateau:

CROP	FEATURES
Coffee	Karnataka is the leading producer, followed by Kerala. Arabica and Robusta varieties are mostly cultivated.
Tea	Confined to Nilgiri Hills and Western Ghats across Tamil Nadu, Karnataka, and Kerala. Creates extensive employment.
Sugarcane(Second Term Exam -2025)	Deccan Plateau provides favorable growing conditions. Uttar Pradesh is the top national producer.
Cotton	Kharif crop.Gujarat is the leading producer in India, followed by Maharashtra.Requires 21 Degree Celsius to 30 Degree Celsius of temperature and 50 to 100 cm annual rainfall. The black soil in the Deccan-Malwa Plateau regions is the most suited for cotton cultivation.

SURE A PLUS NOTES SIX SS

36. Write the favorable conditions for Sugarcane in Peninsular India? (Second Term Exam -2025)

- Black lava soil of the Deccan Plateau.
- Tropical climate and long crushing season.
- Higher sucrose content in tropical sugarcane varieties.

37. Why does cotton cultivation in Peninsular India begin in October and harvest from January to May?

Because the crop requires seven frost-free months during its early growth stage.

Downloaded From: https://textbooksall.blogspot.com/

38. Which place in India is termed as the heartland of minerals? Give reason.

^ Chota Nagpur Plateau.

^ It spreads over Jharkhand, West Bengal, and Odisha, forming the richest mineral belt in India containing coal, iron ore, manganese, mica, bauxite, and copper.

39. the Peninsular Plateau can be divided as different mineral zones. Explain

MINERAL ZONES	MINERALS	STATES
Northeastern Plateau Region	Coal, iron ore, manganese, mica, and bauxite and copper	Jharkhand, West Bengal,Odisha
Central Region	Manganese, bauxite, limestone, marble, coal, mica, iron ore	Chattisgarh, Madhya Pradesh, Telangana, Andhra Pradesh and Maharashtra.
Southern Region	Iron ore, bauxite and lignite	Karnataka Plateau and the adjoining parts of Tamil Nadu.
Southwestern Region	Iron ore, clay	Western Karnataka and Goa.
Northwestern Region	Copper, lead, zinc, uranium and mica	Aravali range in Rajasthan and the adjoining parts of Gujarat

40.Why human settlements in the Peninsular Plateau were limited In the earlier stages?

Due to non-arable topography and continental climate.

41. Which were the favourable factors that led to an increase in population of Peninsular Plateau?

$ Beginning of mining activities $ Development of road-rail network

$ Emergence of mineral-based industries $ Scope of commercial agriculture based on irrigation

$ Technological possibilities

42. Name any 5 major cities in the Peninsular Plateau?

Jaipur , Bangaloru, Thiruvananthapuram,Mumbai,Hyderabad

43.Substantiate the Climate of Peninsular Plateau (Second Term Model Qn Paper)

^ Barring the mountain region, the average summer temperature in the Peninsular Plateau is more than 30 Degree Celsius.

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

^ Temperature at the Deccan Plateau generally touches 38 Degree Celsius in March.
^ Generally low temperature prevails at higher elevations in the Western Ghats. ^ The diurnal range of temperature is very high along the interiors of the plateau due to the considerable fall in the night temperature.

44.Rainfall is moderate or scanty throughout the Peninsular Plateau except the western slopes of the Western Ghats. (Second Term Model Qn Paper)

> During the southwest monsoon season the moisture – laden winds, raised and condensed along the western slopes of the Western Ghats cause heavy rainfall along the windward side.
> The west coast and the western slopes of the Western Ghats receive 250 to 400 cm rainfall during this period.
> The winds descending along the eastern slopes of the Western Ghats being dry, the plateau regions situated close to the eastern slopes receive very less amount of rainfall (less then 50cm).
> Such regions are termed as rain shadow regions.
> The southwest monsoon winds reaching the Maharashtra coast enter the peninsula through Narmada and Tapti river basins and cause moderate amount of rainfall throughout Central India.
> Chota Nagpur Plateau also receives a small amount of rainfall during this period.
> Peninsular Plateau generally experiences dry climate during the northeast monsoon or retreating monsoon season.
> Though the low pressure whirls developed over the Bay of Bengal causes heavy showers along the east coast, especially Tamil Nadu and Andhra Pradesh, the plateau remains unaffected.

45. What is diurnal range of temperature ?

It is the difference between the maximum temperature and minimum temperature recorded at a particular place in a day.

46.Peninsular Plateau is the storehouse of minerals. Substantiate the statement. (Annual Exam -2025)

< Yes, Especially the Chota Nagpur Plateau Situated at the south of Rajmahal Hills.
< Richest store house of minerals.
<Metallic minerals such as iron ore, bauxite, manganese and copper and non - metallic minerals such as lime stone and coal make this region mineral rich.
< The major economic activities in this region are mining and mineral-based industries.
< Minerals like lime, iron, magnesium and aluminium are characteristics of regur soil in the Plateau

5.Indian economy through various sectors

1.Which are the into three sectors in the economy ?

➢ Primary, secondary, and tertiary sectors

2.Elucidate Primary Sector

◎ The primary sector includes all those activities that utilise the natural resources directly.

SURE A PLUS NOTES Std X SS

Downloaded From: https://textbooksall.blogspot.com/

◎ Agricultural activities, animal husbandry and fishing,Mining,Quarrying,Animal Husbandry which depend on natural resources, are examples for primary sector activities
◎ Since the primary sector gives more importance to agriculture and allied activities, it is also known as the Agricultural sector.

3.Which organisation prepares the economic statistical data of India?

⍈ National Statistical Office (NSO)

4.Briefly explain Secondary Sector

☞This sector includes the economic activities related to industry and manufacturing.
☞It involves the processing of raw materials from the primary sector into finished products.
☞ Since the secondary sector gives more importance to the industries, it is also called the Industrial sector
☞Eg.Construction,Gas- Elecricity-Water supply,Industry

5.Prepare a short note on Tertiary Sector

◊The tertiary sector through its activities make more efficient the economic activities related to the storing and marketing of primary and secondary sectors.
◊The tertiary sector also ensures the services of various fields like health,real estate,banking ,insurance,transportation and education.
◊ Hence it is known as the service sector.

6. Economic growth is ensured by interdependence between the various sectors.Justify the statement

❢ Assistance is provided from the primary sector to the secondary and tertiary sectors.
❢ The agricultural sector produces the raw materials required for the manufacture of industrial products in the secondary sector
❢ The products produced from the primary sector are converted into manufactured products with the help of industrial machinery and the food products required for commerce and marketing go to the tertiary sector.
❢ From the secondary sector, machinery and materials required for agricultural production such as fertilizers, pesticides, water supply, electricity etc. are available to the primary sector.
❢ The tertiary sector provides a variety of services to the primary sector.
❢ Foodstuffs and industrial products produced in other sectors can be brought to the demand through various services in the tertiary sector.

7.What are the major economic activities ?
Or Specify the role of Production, distribution, and consumption in the economic activity? (Second Term Model Qn Paper)

⋐ Production, distribution, and consumption are known as the major economic activities that take place in different sectors.
⋐ **Production** is the process of making goods and services by utilising different factors of production.
⋐ **Distribution** is the process of allocating produced goods and services or income among different individuals and factors of production.
. A part of the income thus allocated is used by the consumer to purchase goods and

SURE A PLUS NOTES STD IX SS

Downloaded From: https://textbooksall.blogspot.com/

services. The balance is kept as saving.

Consumption is the process of utilising goods and services to satisfy various needs and wants

8.Explain National Income

The National Income is the sum total of the money value of all final goods and services produced in an accounting year.

In India, the financial year commences from 1 st April and closes on 31st March.

9.Differentiaate Final goods and intermediate goods?

Final goods are those that can be consumed directly.

A product that is used as a raw material to produce another product is known as intermediate goods.

10.Specify the importance of calculating National Income (Second Term Exam -2025)

- Can understand the economic growth of the country.
- Can assess the contribution of different sectors.
- Can help the government plan and implement various projects.
- Can compare the economic status of countries

11.Tabulate the methods of measuring National Income(Second Term Model Qn Paper)

Product Method	# This method calculates national income by adding the value of all final goods and services produced in the primary ,secondary and tertiary sectors of an economy in a financial year. # This helps us to identify the contributions made by different sectors towards the National Income and ensure due apportion to each sector. # National Income (NI) = x 1 + x 2 + x 3 + x 4 ..... + x n

Income Method	# In income method, national income is the sum total of the incomes generated by land, labour, capital and organisation in the form of rent, wages, interest and profit.
	# This method helps us to identify the proportion of income of each factor in the National Income.
	# By income method, we re able to calculate the Gross National Income.
	# National Income NI = r + w + i + p
	r = rent, w = wage, i = interest, p = profit

Expenditure method	# In this method, national income is calculated by adding together all the expenses incurred in the purchase of goods and services to carry out various economic activities. # National Income (NI) = C +1 + G + (X-M) # We can calculate the Gross National Expenditure (GNE) by Expenditure Method

12.Important concepts related to the National Income calculation

GDP is the sum total of the money value of all final goods and services produced within the domestic territory of a country.

'Domestic territory' denotes a region under the jurisdiction of a national

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

government which has absolute freedom for performing economic activity.
◎ While calculating GDP, the income received by those who work abroad and the profit earned by enterprises and institutions abroad are not included.
◎ For example; the economic gain made by an_ Indian company abroad will not be included in the GDP.
◎ **Gross National Product (GNP)** India's GNP is calculated by adding the income of Indians and Indian firms abroad to the GDP.
◎ At the same time it excludes the income earned from India by foreign national and foreign firms.
◎ GNP is the sum total of the money value of all final goods and services produced by the residents of a country within the domestic territory and abroad.
◎ **Net National Product (NNP) -** When we calculate national income ,we consider depreciation cost .
◎When we reduce depreciation cost from Gross National Product we get Net National Product.
◎**Per Capita Income (PCI)-** By dividing the national income by the total population of a country

$$\text{Per Capita Income (PCI)} = \frac{\text{National Income}}{\text{Total Population}}$$

13.List the limitations in measuring National Income(Second Term Exam -2024)
⁂ Lack of accurate statistical data
⁂Double counting ⁂ Non inclusion of goods and services produced for self consumption. ⁂ Not including those products whose monetary value is not determined in the market. ⁂Value of household work not included .
14.Briefly explain Gross Value Added (GVA)? How it calculates
he sum total of the value of goods and services produced in an economy.
® Gross value added is calculated by subtracting value of intermediate consumption from gross product value.
® Gross Value Added (GVA) = Gross Product Value - Value of Intermediate Consumption
® Intermediate consumption indicates the consumption of raw materials used to produce a goods or service.
GDP = GVA + (Product tax - Product subsidy)
15.The share of tertiary sector is more compared to other sectors in GVA of India and GSVA of Kerala. Let's examine and find out why. (Second Term Model Qn Paper)
₩Programmes implemented for the development of the health and education sector.
₩ The growth of the banking and insurance sector facilitating the country's trade and commerce.
₩Growth of transport and communication sector
₩ Tourism development
₩ Growth of knowledge-based industries
15. The Government has given priority to the development of knowledge- based sectors. Give reasons?Write examples?
OR The knowledge-based sector plays an important strengthening the tertiary sector.

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

Evaluate the statement

۞ Human capital refers to the individual traits that are useful in the production process.

۞ This includes knowledge, skills, health and education of human resources.

۞ Knowledge-based sector effectively utilises knowledge and technology for attaining economic growth.

۞ Indian information and communication technology has grown to such an extent that it even provides the software services in the international level.

۞ It opens up a great opportunity and possibility for the younger population of India below 35 years

16.What are the factors favourable for fostering/nourishing the knowledge sector ? (Second Term Exam -2024)

✪Ability to handle foreign languages with ease

✪ Improved scientific and technological growth

✪ Extensive government-cooperative-private sectors

✪The ever evolving markets which grow day by day-all these helping the development of a knowledge-based sector and to enhance the contribution of the tertiary sector in national income.

17.The employment sector can be divided into two. Compare (Second Term Model Qn Paper)

Organised Sector	Unorganised Sector
۞ Registered employment sector ۞ Permanent jobs ensured ۞ Comparatively high salary ۞ Job security	۞ Unregistered employment sector ۞ No assurance of permanent job ۞ Comparatively low salary ۞ Lack of job security

18.Point out the problems faced by the unorganised sector (Second Term Model Qn Paper)

@ Unsafe work places @ Long working hours @ Low wages

@ Lack of job opportunities @ Backwardness

19.Mention the laws passed for unorganised sector workers (Second Term Exam -2025)

The Unorganised Worker's Social Security Act – 2008

§ Policies to ensure healthcare of unorganised workers, maternity benefits, old age protection, education, housing and various social security benefits

The Code on Social Security - 2020

§ Giving importance to the measures that ensure social security of the employees under organised and unorganised sectors.

§ Confers various benefits on the self-employed, housekeepers, daily wage workers, workers from other states, and gig platform workers

§ Grants given to physically and mentally challenged workers, accident insurance, maternity benefit, free medical benefits and old age protection

20.Prepare a brief note on Gig platform workers

A worker who works outside the conventional employer employee relationship and earns money from it.

SURE A PLUS NOTES Std X SS

Downloaded From: https://textbooksall.blogspot.com/

Features

£ The engage formal contracts with companies when needed
£ The jobs are temporary and must be completed in a time bound manner
£ They can walk in more than one establishment simultaneously
£ They have the freedom to work according to time and situation

Through the Sandy Expanse

1. List the features of deserts that make them stand out from other parts of the world?
? Arid Climate ? Sand dunes ? Lack of rainfall
? Plants that include thistles
2. What do you mean by deserts?
e Deserts are generally the places that receive an annual rainfall of less than 25 cm
3. Deserts are classified into two. What are they?
Cold deserts
Hot deserts
4. Elucidate the features of Cold deserts?
£ The places with permanent snow cover
£ Experience extreme cold throughout the year.
£ Found in polar regions, mountains and high plateaus of temperate regions.
5.Write the features of hot deserts?
§ Arid places
§ Found between 15 Degree and 30 Degree latitudes
§ Along the western margins of the continents.
§ Very high temperatures during the daytime
§ Very low temperatures at night.
6. What is the study of deserts is called ?
^ Eremology
7. The diurnal range of temperature is very high in hot deserts.Evaluate
¢ Lack of Cloud Cover
¢ Low Humidity
¢ Sandy and rocky surface
¢ Sparse vegetation
¢ High solar radiation
8.Which is the hot desert in India?
< Thar Desert or The Great Indian Desert.
9.The natural boundaries of the Thar Desert

North west	Sutlej River Basin
East	Aravali Mountains
South	Rann of Kachchh
West	Indus River Basin

10.Give brief account on common features of the Thar Desert ?
✪ Expansive arid region located in the northwestern part of the Indian Subcontinent.

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

✪ Area of around 200,000 square kilometers 175,000 square kilometers are located in India.
✪ About Two-thirds of the Thar Desert in India is situated in the state of Rajasthan
✪Remaining portion extends over to the states of Haryana, Punjab, and Gujarat.
✪ Also extends into the Punjab and Sindh provinces of Pakistan.
13. What are the conditions thatthat led to the formation of the Thar Desert?
⊙ Arid climate ⊙ Presence of Aravali Range ⊙ Wind Erosion
⊙ Sparse Vegetation ⊙ Sandy and Porous Soil
14. Rainfall in western part of the Rajasthan is very scanty throughout the year. Why?
₩ The southwest monsoon winds passes parallel to the Aravali mountains without entering the interior parts of Rajasthan receiving very low rainfall
₩ The movement of the Bay of Bengal branch checked by the Aravali mountains, so do not receive rain
₩ The high rate of evaporation and the arid winds in these areas reduce the possibility of rainfall.
15. Is the Thar Desert a rain shadow region? If so, based on which branch of the South west monsoon winds is the Thar Desert said to be a rain shadow region?
< Yes,the Arabian branch of the South west monsoon wind.
16.Briefly explain geographical divsions of Thar desert
$ The Marusthali- Marusthali is a vast sandy expanse with a few outcrops of bedrock.
* The bedrock is composed of gneisses, schists, and granites.
* The bedrocks in this region indicate that it is the northwestern extension of the Peninsular Plateau.
* The average elevation of this region is between 200 and 250 meters above mean sea level.
* In general, the eastern part of the Marusthali is rocky while its western part is covered by shifting dunes locally known as Dhrian
$ The Rajsthan Bagar- The eastern part of the Thar Desert, up to the Aravali range, is a semi- arid plain known as the Rajasthan Bagar.
* The region is drained by several short seasonal rivers originating from the Aravali.
* These rivers make agriculture possible in some patches of fertile tracts called Rohi.
* The most significant river in this area is the Luni, which is a seasonal river that flows towards the Rann of Kachchh.
* The sandy plain to the north of the Luni River is called Thali.
17.Write the importance of River Luni ?
Originates from the Aravali mountain range near Ajmer.
Non perennial river.
Major tributaries - River Lilri, River Sukri,and River Jawai
Takes its name from the Sanskrit word 'Lavanavari', meaning 'salt river'.
After flowing a distance of around 482km, this river disappears in to the Rann of Kachchh
18. Name the important lakes in Rajasthan Bagar region?
€ The Sambhar Lake, the Didwana, the Sargol and the Khatu
€ The most significant and the largest among them is the Sambhar Lake
19. The salinity in the water bodies of the Thar Desert is high, Why?

SURE A PLUS NOTES Study SS

Downloaded From: https://textbooksall.blogspot.com/

® Evaporation ® Low Rainfall ® Ground water salinity
® Arid climate

20.What is deflation?

➢ Erosional process through which the sand is blown away by wind is called deflation

21. How Deflation Hollows are formed?

⁂ When winds blow strongly and persistently in one direction, shallow depressions are formed called Deflation Hollows.

22. What is Abrasion?

⌘ Strong desert winds carry sand grains and other rock particles.

⌘ These rub strongly against the numerous rock outcrops and wear them down. This erosional process is called Abrasion.

23. How mushroom-like landforms are formed?

℮ The portions of the rocks subjected to high rates of abrasion wear out considerably more.

℮ As the rocks wear out in this manner, mushroom-like landforms are formed

24. List out the different types of erosion landforms found in the Thar Desert?

Deflation Hollows # Caves # Mushroom Rocks

25. How Sand dunes are formed?

⁇ When the velocity of the wind decreases or the movement of the wind is checked, the sand grain carried away by the wind are deposited.

⁇ These deposited sand grains gradually pile up and form various depositional landforms of different sizes and shapes. These landforms are Sand dunes

26. Name the landforms (Sand dunes) which are formed through the process of deposition by wind?

◊ Barchans(Crescent shaped sand dunes) ◊ Parabolic sand dunes
◊ Sief dunes ◊ Longitudinal dunes ◊ Linear sand dunes
◊ Transverse dunes

27.What is Oases?

^ Oases are the fertile patches in deserts formed because of the presence of a fresh water source.

^ They originate either at natural springs or at other ground water sources. Oases vary in size.

^ Cotton, citrus plants, fruit plants, wheat and corn are commonly cultivated in many oases.

28.What are the different seasons experienced in Rajasthan?

Summer season # The rainy season # The retreating monsoon season
The winter season

29. Explain the features of Summer season ?

$ Very hot and dry begins in March ends by June
$ The daytime temperature increases
$ The atmospheric humidity is very low.
$ Hot winds called 'Loo' and dust winds are characteristic features

30. Write a s hort note on the rainy season

^ Experienced from July to September.

^ Though the southwest monsoon causes rain, the region experiences comparatively

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

very low annual
rainfall.
^ While the eastern part of the Aravali mountains receives an annual rainfall of about 76.2 cm
^The Thar Desert in the west receives an annual rainfall of less than 25 cm.
31. List the features of retreating monsoon season?
> In the months of October and November
> Rainfall decreases considerably.
> Almost all places in the Thar Desert receive little to no rain.
32. Write short note on the winter season?
< Begins in December, ends by February.
< With mean minimum temperatures ranging from 5 Degree to 10 Degree Celsius.
< Clear skies, low atmospheric temperatures, low humidity, and gentle breezes
< Extreme cold is experienced here in January.
<The night time temperature often falls below 0 (zero) Degree Celsius in places like Bikaner, Churu and Sikar.
33.What are the major soil type found in the Thar Desert? Write the features of it?
⚹ The Desert Soil (The Arid Soil)
⚹ Vast sandy expanse
⚹ Soils composed mostly of sand.
⚹ Sandy structure and brown colour
⚹ Alkaline in nature
⚹ Crops suited to this soil type and climate can be cultivated in many places with sufficient irrigation.
34. The desert soil has high salinity. Why?
☞ Due to the high rate of evaporation caused by high temperature and arid climate experienced in this region.
35. What are the major plant types in the Thar Desert?
• Thorny plants and shrubs are the major vegetation types.
• Drought resistant plants like Gum Arabic acacia and Euphorbia grow in these areas, particularly in the Eastern Hills.
36. Write short note on fauna of the Thar Desert?
⌑ A wide variety of reptiles, scorpions, mongooses, red foxes, chinkara (the Indian gazelle), falcons, and Indian spotted eagles.
⌑ The Indian bustard, a bird species swiftly disappearing from other parts of India, as well as blackbucks and wild cats, are also seen here
37. Evaluate the human life in the sandy expanse
➢ Sparsely populated region.
➢ Human life in most of the region is difficult.
➢ People inhabit only those places conducive to living.
➢ Most of the people live in rural areas.
➢ When droughts become severe, many groups migrate as nomads to other places suitable for human habitation
38. What are the features of agriculture in the Rajasthan desert?
☞ Arid climate prevails, does not provide conditions favourable for agriculture.

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

☞ Only the crops that require a minimal amount of water for their growth are mostly cultivated here.
☞ Crops are cultivated even on commercial scale by using irrigation facilities.
☞ Major crops include bajra, jowar, wheat, corn, millets, groundnut and cotton.
39.Which is the important irrigation project in the Rajasthan region where irrigation is particularly significant?
Indira Gandhi Canal Project
40. Name the world-famous marble from Rajasthan?
@ Makrana marble
@ The Taj Mahal, one of the wonders of the world, is made of Makrana marble
41. What are the minerals of Rajasthan?
$ Deposits of lead, zinc, silver, copper, tungsten, manganese, iron, gypsum, lignite, and limestone.
42. What craft items made of leather are a specialty of the Rajasthan region?
⌘ Lampshades, pouches, sandals, traditional indigenous musical instruments made up of camel hides
43. What are used here for energy generation.?
✪ Windmills and Solar panels
✪ Energy is primarily used for desalination of water.
52. Tourism is a major source of income for the Thar Desert. Justify
⚹ The national parks in this region attract many tourists.
⚹ Places of attraction include Hawa Mahal, Ajmer Fort, Dilwara Jain Temple, Ranakpur Jain Temple and more.
⚹ Tourism in the desert provides locals with numerous employment opportunities.
⚹ It's common to see tourists travelling on camel back, with local guides.
53. Write the challenges of human life in the Thar Desert?
☞ Harsh physical conditions (absence of rain, extreme heat and strong winds)
☞ During summer lead to acute water scarcity.
☞ A good network of roads is not possible in the desert (strong winds, melting of tar due to extreme heat)
☞ Inadequate communication facilities

SURE AREAS NOTES Std IX SS

3.LAND GRANTS AND INDIAN SOCIETY

1.What was the purpose of land grants by the king?
⌑ To attain victory , longevity , welfare and peace in this world as well as in afterlife,King given land as a gift to the Brahmins.
2.Name the dynasty who ruled the Deccan region, started the practice of giving land grants to please the Brahmins?
☞ The Satavahanas
3.What was the differences in Land Grants of the Satavahanas and the Guptas (Second Term Exam -2025)
•**The Satavahanas** - Right to the resources of the land only was given
• **The Guptas** - Along with the resources of the land, rights over the people living there also were transferred

Downloaded From: https://textbooksall.blogspot.com/

4.Write the changes brought about by the land grants during the Gupta period? (Third Term Model Qn Paper)

◊ The king's authority over the donated land gradually declined.

◊ The right to collect taxes and administer justice over the donated land was transferred along with the ownership of land.

◊ Those who received the land grants also got the right to grant the land to someone else.

◊ In course of time, the kings and nobles began to give land grants instead of cash as remuneration for the services they received.

◊ Although most of the land grants were received by the Brahmins,gradually, other sections also started receiving land as grant.

5.Irrigation methods that helped the expansion of agriculture in Gupta Period

* **Canals** -Water raised from wells reached farmland through channels

* **Dams** -Skandagupta rebuilt the Sudarsana Lake in Gujarat

* **Rainwater**

The most important source of water

* **Tank/ Water Reservoir** - Rainwater was collected and used for agriculture,Water reservoirs were built in South India,Tanks were constructed in North India

* **Ghatiyantra (Araghata)** - Pots are attached to a wheel.When the wheel is rotated the pots are filled from the source and emptied into the field

6.'Indian Feudalism' - write short note (Second Term Model Qn Paper)

or Write the characteristics of the Samantha System that came into existence during the Gupta period (Second Term Model Qn Paper)

• A powerful section of land owners with immence wealth and influence was formed in the society.

• Those who worked on the land became rightless dependents of the landlords.

• In addition to taxes, people from the lower stratum of the society had to provide free services to the upper stratum.

5.Factors that helped progress of agriculture in the Gupta Period (Second Term Exam - 2024)

* Uncultivated areas were made suitable for agriculture

* The new social system provided sufficient labour-force for agriculture

* The knowledge of Brahmins about agricultural technology and climate

* Different irrigation facilities

6.Find out the crafts of the Gupta period

? Pottery making ? Jewellery making ? Pearl making

? Glassware Manufacturing ? Silk/Cotton Garment Manufacturing

? Ivory sculpture

7.Who were 'Srenis' or 'Guilds'?Write their responsibilities? (Second Term Model Qn Paper)

* Associations of people who engaged in the same craft

*'Srenis' were associations of craftsmen and traders.

*Collecting raw-materials,controlling production and marketing the finished goods

8.Write short note on external trade of the Guptas? (Second Term Model Qn Paper)

• Had external trade links with West Asia,Central Asia, South East Asia, and

SURE A PLUS NOTES Std X SS

Downloaded From: https://textbooksall.blogspot.com/

Rome.
• New trade routes developed during the period.
• Gold, silver and copper coins of high quality were minted.
• Prominent traders known as 'Nagarasreshtin' and 'Sarthvaha' had their role in the government
9.Names of important centres of trade in Gupta period? (Second Term Model Qn Paper)
• Vaishali, Pataliputra, Kanauj, Shravasti, Kausambi, Ujjayini and Mathura
The following Gupta cities were located present Indian states of
• Vaishali – Bihar • Pataliputra – Bihar • Kanauj - Utterpradesh
• Shravasti – Utterpradesh • Mathura – Utterpradesh • Kausambi – Utterpradesh • Ujjayini – Madhyapradesh
10.Write the reason for the decline of India's foreign trade during the Gupta period? (Second Term Model Qn Paper)
℮ The collapse of the Roman Empire by the 6 th century CE.
℮ The westerners had learned the technique of silk-making from the Chinese.
11.Write down the reasons for the decay of many major towns of Gupta?
⌘ The slump in trade
⌘ The general decline in crafts
⌘ Ruralisation
12.Social life of Gupta period? (Second Term Exam -2025)
⁂ Various occupational groups (Srenis) were formed
⁂ Formation of a number of sub-divisions in the society.
⁂Impossible for the existing varna system to accommodate all these new occupational groups.
⁂ Each occupational group became a new 'jati' or 'upajati'.
⁂ People who came from outside the subcontinent, the forest dwellers ('Nishadas') and children born of inter-caste marriages also formed new 'jatis'.
⁂ Evolved complex caste system
⁂ No change in the position and privileges of the Brahmins, Kshatriyas and Vaisyas in the new complex system.
13.Write short note on 'Antyajas' ? (Second Term Model Qn Paper)
• The 'Antyajas'who were outside the Chaturvarnya system were considered 'untouchables'.
• The lowest among the 'Antyajas' were the graveyard keepers called 'Chandalas' and the animal skin
tanners called 'Charmakarar'.
14.Give an account on Position of women in Gupta Period (Second Term Exam -2024)
*Women had a low status in society.
* All women, from queens to the women of the lowest section in the society, were expected to be submissive to men.
* Even the upper-class women did not enjoy a high position or consideration in the society.
* There is no evidence of land grants received by even a Brahmin woman.
15.Gupta kings had extensive powers.What are the responsibilities of Gupta kings? (Annual Exam -2025)

SURE ARTS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

➢ Protect the people from aggressions
➢ Protect Brahmins, Sramanas (Buddhist/ Jain monks) and the weaker sections ➢ Administration of justice

16.Write the main features of construction of temples during the Gupta period?

® Construction of Structural Temples using stone and bricks
® Sculptures

17.Point out the features of the Ajanta Caves?

• (Maharashtra) belong to the Gupta period.
• Depict royal life, royal court and celestial beings.
• Scenes from the Ramayana and the Mahabharata also became themes of these paintings.
• Natural colours were used to paint these pictures.

18.Sanskrit literature received royal patronage during the Gupta period. Justify this statement? (Second Term Model Qn Paper)

§ Sanskrit was the language of administration.
§ Even the Buddhists who had been using common languages like Pali started writing in Sanskrit.
§ The Ramayana, the Mahabharata and most of the Pumnas were codified in written Language (oral to written) and converted into the present textual form during this period.
§ Dramas, poems, Grammar, and Lexicon were composed during this period in Sanskrit.
§ In drama upper caste male characters spoke in Sanskrit.
§ Women characters including the queen, and male characters belonging to castes considered lower used only Prakrit language.

19.Frame a table on six system of philosophies and their proponents (Second Term Exam -2025)

Philosophy	Exponent
Samkhya	Kapila
Yoga	Patanajali
Nyaya	Gauthama
Vaisheshika	Kanada
Vedanta	Badarayana
Mimamsa	Jaimini

20.Evaluate the contributions made to the field of science during the Gupta period

* Books on science were written during the Gupta period.
* Most of the works were on Astronomy, Mathematics, and Medical Science.
* Notable works of the period were Brihatsamhita of Varahamihira, Aryabhatiya of Arya Bhata and Amarakosa of Amarasimha

21.Name an excellent example for the technological skills achieved in metallurgy during the Gupta period?Write its features?

£ The iron pillar built at Mehrauli near Delhi

SUREA PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

£ Weathering the rains and heat for several centuries, this iron pillar shows no sign of rusting.

22.What were the important dynasties of South India during the period?

• The Pallavas and the Pandyas

23.Write short note on the economic changes brought about by the spread of the land grant system to South India? (Second Term Model Qn Paper)

€ Granting of land to the Brahmins led to the development of agriculture

€ Brahmins' knowledge of agricultural technology and climate helped the expansion of agriculture.

€ Kings and local administrative bodies encouraged agriculture by building reservoirs and maintaining irrigation facilities.

€ Surplus production in agriculture led to the progress of trade.

€ Maritime trade flourished along with internal trade.

€ Expansion of agriculture, growth of trade, and a variety of crafts Land gifted became the sources of revenue

€ People had to pay for to of the produce as land tax.

24.The major texts of the period (Second Term Exam -2024

Name of the Text	Author	Genre of Literature
Abhijnana Sakunthala	Kalidasa	Drama
Kumarasambhava	Kalidasa	Poem
Mriccha Katika	Sudraka	Drama
Swapnavasavadattha	Bhasa	Drama
Thrikandi	Bhartrhari	Grammar
Amarakosam	Amarasimha	Lexicon

25.Name the busy ports under the Pallavas?

• Mahabalipuram, Nagapattanam

26.Name the merchant guilds in North India and in South India?

₩ 'Srenis' (North India)

₩ 'Vanika' (South India)

27.Name the chief items of export from the Pandyan Kingdom?

Pepper, sandal, gold, and pearls

28.Write the names of ports through which the Pandyas traded with the Roman, Greek, Chinese and Arab merchants?

$ Korkai, Kayal Pattanam and Periya Pattanam.

29.Write the type of lands which were exempted from land tax?

*The Brahmadeya land granted to temples and the Agralaras (Brahmin villages)

30.Make a short note on the social and cultural life of South India?

• The Pallava-Pandya societies were based on the caste system.

• The Brahmins who received large extents of land as Brahmadeya were wealthy and they had a dominant status in society.

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

• Those who were considered as low castes suffered many hardships.
• There were also sections outside the varna system.
31.There was village autonomy in the Pallava and Pandya kingdoms.Evaluate
< Village courts existed.
< Education, justice, etc. were administered and disputes were discussed and settled through collective opinion.
< The Kings did not interfere in such matters.
< Neither did they interfere in the customs, practices of worship or caste rules
32.What was the role of the Bhakti movement in the socio-cultural life of South India?
◎Pallas and Pandyas built Saiva Vaishnava temples and promoted Bhakti movement,
◎ The ideas of Brahmanism and Bhakti were reflected in the South Indian literature of that time
33.Name the Pallava king who composed Mathavilas Prahasanam?
• Mahendravarman I
34.Temples of South India had a considerable influence on the life of the people at that time.Justify
✪ Temples were the chief works of art of that period.
✪ Important temples of the period are situated in Kanchipuram, Mahabalipuram and Madurai.
✪ South Indian style of temple construction known as 'Dravidianstyle' evolved during the period of the Pallavas.
35.Temple constructions developed, through three phases.Which are they?
• Rock-cut temples
• Monolithic chariot temples
• Structural temples
36.There are three main styles of Indian temple architecture.Which are they?
@ Nagara, Dravidian and Vasara styleperiod
37.Write short note on the features of Dravidian Architecture? (Second Term Exam -2025)
• The 'Dravidian' style prevailed in South India.
• Huge mandapas was the chief characteristic of Dravidian architecture.
• Have certain specific features. They are, Sreekovil' or 'Garbhagriha (Sanctum Sanctorum), 'Vimana' (the top portion of the temple building), Sikhara (the top portion of the vimana), 'Mandapa' and 'Pradakshina patha' (Path for circumambulation).
• Gigantic entrance gateways, tall 'gopuras', (towers), carved elephants, horses, and dragon faces indecorative styles are the characteristic features of the Dravidian style.
• Pallavas were the first to prove excellence in Dravidian architecture. Eg.Temples at Mahabalipuram

5.Demographic Trends in India

1.What problems arise when the population increases? (Second Term Exam -2025)
➔ Poverty ➔ Unemployment ➔ Starvation
➔ Malnutrition ➔ migration ➔ Food shortage
➔ Creating crises in the health sector and quality of life
2.Factors that determine the social development index of a

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

country or region?

➢Population data ➢ Birth rate

➢ Death rate ➢ Infant mortality rate ➢ Age structure

3.What is Demography?

•It is the branch of science that deals with the population structure such as birth and death rates, migration,and population density.

4.The structure and composition of the population of an area is taken into consideration on account of some factors.Which are they?

▫ Age structure ▫ male-female ratio ▫ dependent ratio etc

5.Tabulate the two branches of demography (Second Term Model Qn Paper)

Social demography	Investigates the structure of social demography and its causes and consequences of change. It emphasises the socio- economic and political patterns of a region.
Formal demography	It measures and analyses the factors of population change. Census is an example for a formal demographic study. It collects and analyses data on population and the socio-economic status of the country.

6.Answer the following (Second Term Exam -2024)

* The first census in India was conducted in1872 during british rule.

* The first complete census was conducted in 1881

*The first census after independence in 1951

*Name the branch of science deals with Population structure-Demography

*What is the interval of census-10years

*Name the institution heads census activities-Registrar General and Census Commissioner

7.List the need/importance of Demographic Studies

➢ Analyzing diverse human resource and structural changes.

➢ To plan action programs.

➢ To determine the quantity of goods and services

➢ To understand economic and social progress

8.What are the diffferent indicators of demography (Second Term Model Qn Paper)

☞ Migration ☞ birth rate ☞ population density

☞ female male ratio and child sex ratio ☞ life expectancy

☞ age structure ☞dependency ratio

9.Define the following

◊ **Size of population** - Total number of people living in a country at a given time

◊ **Population Growth** - The population of an area increase over a given period of time

◊ **Population growth rate** - Indicates the percentage increase in the population compared to the previous year.

10.Define Migration (Second Term Exam -2025)

$ Migration is the permanent or temporary settlement of people from one region to another. There are two types of migration.

Internal migration -migration within a countries border.

SURE A PLUS NOTES STUDY SS

Downloaded From: https://textbooksall.blogspot.com/

Eg people of Kerala going to other states. .

International migration -migration across country borders.

Eg Movement of people from India to gulf countries

11.Migration causes the change in the population structure of an area.Justify

? Population increases in an area; Another region is depopulating.

? The population of that area will decrease from which area one migrates from.

? Migration to an area increases the population of that area.

12.What might be the reasons for their migration in search of employment?

➢ Better income ➢High social status ➢ High standard of living ➢Financial conditions ➢ The weather ➢landscape ➢ Urbanization

13.What you mean by Birth rate and Death rate?How it influences growth of population?

• Birth rate is the number of live births per thousand of the population.

• Death rate is the number of deaths per thousand of the population in a particular area at a specific time.

• Population growth slows down when the birth rate is low and the death rate is high.

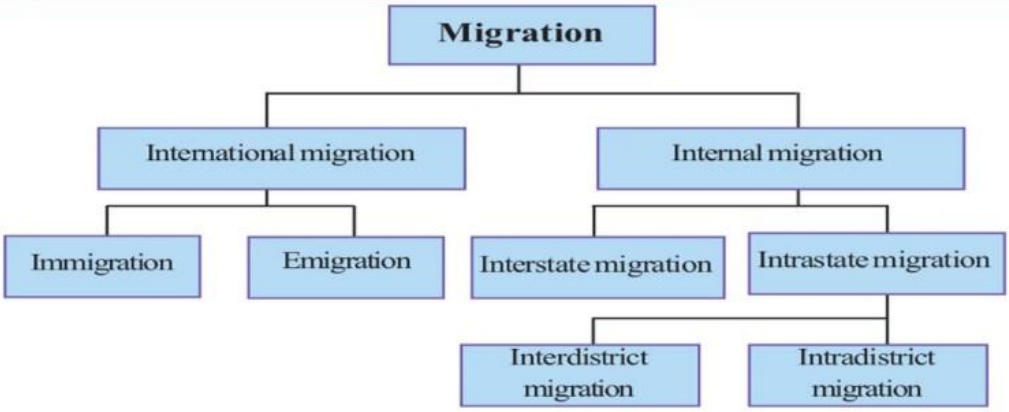

• Population increases when the birth rate exceeds the death rate

14.What is the difference between population and Density of Population?

e The population of an area is the total number of people residing in that area during a specific period of time.

e But the average population per square kilometer is called Density of Population

15.Complete the flow chart showing the different levels of migration?

16.What are the social problems in densely populated areas?

⌘ Lack of open spaces ⌘ Pollution ⌘ Lack of water storage ⌘ Crowding ⌘ Overpopulation ⌘ Transportation problems ⌘ Drinking water problem ⌘ Slums ⌘ Unemployment

17.Why do some Indian states have a higher population growth and some have lower?

• Climate • Topography • Availability of water • Types of soil • Domestic problems • Pollution • Infectious diseases • Natural disasters • Lack of availability of ground water

18.Define Sex Ratio and Child Sex Ratio

⁂ Sex Ratio (Sex Ratio) is the number of females per thousand males in a particular area during a specific period of time.

⁂ The child sex ratio is defined as the number of females per 1000 males in the age group 0-6 years.

Downloaded From: https://textbooksall.blogspot.com/

⁂ Male-female ratio in Kerala – 1000:1084
⁂ Male-female ratio in India– 1000:943

19.What might be the social problems created by the decreasing male- female ratio? (Second Term Model Qn Paper)

® Marriage Squeeze ® Social Instability ® Psychological Impact ® Social Isolation ® Imbalance in Family Structures ® Economic Consequences ® Shifts in Attitudes Toward Gender

20.Define Life expectancy (Second Term Model Qn Paper)

§ A person's life expectancy is an estimate of how long he lives on an average Factors contribute to the high life expectancy rate

21.Why high Life expectancy in Kerala than other states (Second Term Exam -2025)

➢ High literacy rate and higher education ➢ Decentralised public health policy ➢ Cleanliness ➢ Food availability and public distribution

22.Elucidate Age structure of population?Which are the three types of age group? (Second Term Model Qn Paper)

^ Age structure of population is the proportion of persons relatively in different age groups.

^ 0-14 - Children
^ 15-59 - Young people
^ Above 60 – Elderly

23.Prepare a brief -short note Age Structure

@ Age Structure of population is the proportion of persons relatively in different age groups.

@ Population age structure is the ratio of the population to different age groups and the proportion of each group to the total population

24.What is Dependency ratio .How it affects development of a nation (Second Term Model Qn Paper)

₩ Dependency ratio is the criterion used to compare the dependent category of population and the working population.

₩ Dependency ratio helps to understand the number of people who need welfare and care and to formulate plans for them.

₩ One of the problems facing the country is increasing the number of elderly people as the dependency ratio rises.

₩ Employable population (aged between 15 and 64)) is responsible for taking on the bulk of the unemployable Dependency Ratio

₩ Decreasing leads to economic progress in the country

25.Briefly explain Demographic gift or Demographic dividend (Second Term Exam -2025)

✪ A decrease in dependency ratio leads to economic progress of the country

✪ Number of employed people to be more than the number of the unemployed among the working age population

✪ This is called the demographic gift or demographic dividend

26.Name the nodal agency of the government for entrepreneurship development and

SURE A PLUS NOTES Std IX SS

activities in Kerala?

- Kerala Startup Mission

Extention of Democracy through Institutions

1.Which are the constitutional institutions have been working for the establishment of democracy.

- National Commission for Minorities
- National Commission for Backward Classes
- National Human Rights Commission
- National Commission for Women
- National Commission for Scheduled Castes and the National Commission for Scheduled Tribes
- National Election Commission

2.Differentiate the constitutional bodies and the extra constitutional bodies?

- The constitutional bodies are autonomous bodies formed when the Constitution came into force.
- The Constitution is the source of power of the constitutional bodies. Constitutional amendment is essential for effecting any change in the power or structure of these bodies.
- Extra constitutional bodies are formed by the laws passed by the Parliament. They can be given constitutional status as and when required.

3.Specify the importance of the Election Commission?

- In a democratic system of governance, people's representatives and rulers come to power through elections.
- The Election Commission of India is an independent and authoritative governing body for ensuring fair and impartial elections.
- The Election Commission of India came into existence on 25 January 1950 based on Article 324 of the Indian Constitution.

4.Briefly explain the structure of Election Commission

- It came into existence on 25 January 1950 based on Article 324 of the Indian constitution.
- The present Election Commission consists of a Chief Election Commissioner and two commissioners.
- They are appointed by the President of India.
- The tenure of office of the members of the commission is 6 years or up to the age of 65.
- The Chief Election Commissioner can be removed through impeachment
- The first Chief Election Commissioner of India was Sukumar Sen

5.Functions of Election Commission

*Preparation of electoral roll and issuance of identity card.
*Supervise, administer, and control the elections to the offices of the President and the Vice President of India, Members of the Lok Sabha and the Rajya Sabha, and State Legislative Assemblies.
*Promulgation and enforcement of the codes of conduct.
*Recognition of political parties and allotment of symbols to them. Issue election notifications, receive, scrutinise and accept nominations, and publish the lists of

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

candidates.
*Schedule the dates for poll and its counting, declare results and resolve disputes.
6.The Representation of People Act, 1950
₩ It is an act codifying the provision for fixing constituencies for elections to Parliament and state Legislatures delimiting their boundaries and preparing electoral rolls.
₩ The act stipulates that all constituencies are single- member constituencies.
₩ The Act provides for matters such as division and delimitation of constituencies, appointment of Chief Electoral Officer, District Returning Officers and Electoral Registration Officers and the preparation of electoral roll.
7,Representation of People Act, 1951
€ Act to provide for the conduct of elections to the Indian Parliament and State legislatures and to determine the eligibility and disqualification of those elected, and provide for the settlement of election disputes
€ Deals with the crimes related to election, and the eligibility and disqualification of the members of the Parliament.
€ Defines the invalidation of the members of Parliament and state legislative assemblies, system of election, and the qualifications and duties of the Chief Election Commissioner, District Election Officer, Election Observers and Returning Officers.
€ Defines the registration of political parties
€ Any organization that wants to become a political party has to register with the Election Commission
€ Stipulates the criteria for national party and regional party status and the rules to obtain election
symbols.
8.The Election Commission has an important role in forming a democratic government. Evaluate
£ There were several sections in our society that were marginalised on the basis of social, economic and gender inequalities.
£ The Election Commission has performed the duty of laying the strong political foundation of Indian democracy by making these sections of people participate in the process of election.
£ This constitutional institution makes democracy stronger and meaningful through transparent and fair conduct of the elections at various levels in the country.
9.Elucidate Protection of Human Rights Act, 1993
$ The act defines the formation of the National Human rights Commission, the appointment of this members, including the Chairperson, their removal from office, tenure in office and the activities and power of the commission .
$ The procedure of inquiry of the commission, submission of report, formation of State Human rights Commission.
$ The procedure of their activities and inquiries are laid down in this act.
$ Human rights are the rights to life, liberty, equal treatment and dignity, as assured by the constitution of India and international agreements ratified by India.The Act came into force on 28 sept 1993.
10.Elucidate Functions of the National Human Rights Commission

SURE A PLUS NOTES STD IX SS

Downloaded From: https://textbooksall.blogspot.com/

.To conduct inquiries on complaints related to human rights violation. .Become a party to court proceedings in matters related to the violation of human rights.
.To visit jails and rehabilitation centres and make recommendations for reforms.
.To evaluate the functioning and efficiency of the systems for protection of human rights and give suggestions
.Analyse the international agreements and declarations regarding human rights and take appropriate steps.

11.Give an account on National Women's Commission

The commission was founded on 31 January 1992.
The commission consists of a chairperson, five members and a member secretary.
Appointed by Central govt for 3 years.
Retirement age 65years old.

Functions The most important function of the National Women's Commission is to intervene in the various issues faced by women in society and to suggest legal solutions
The National Women's Commission is equipped with extensive powers for the protection, equality and rights of women.
Submit proposals for legislation to protect women's rights.
Activities for ensuring gender justice.
#Give suggestions to eliminate inequality and discrimination faced by women.

12.What are laws in the country to ensure the rights and safety of women. Write examples

Dowry Prohibition Act, 1961

$ Passed by the Parliament in 1961
$ To eradicate the evil practice of dowry and prevent atrocities in the name of dowry
$ Both, accepting and giving dowry are punishable under this law.

Protection of Women Against Domestic Violence Act, 2005

^ Protection of Women Against Domestic Violence Act came into force in India on 26 October 2006.
^ This law protects women from violence by their life partners or relatives. ^ The broad definition of domestic violence includes all activities that insult women or cause them danger.
^ This law assures protection, boarding and financial help to women who are victims of domestic violence.

13.National Commission for Backward Classes- Functions

>Ensure the effective implementation of the constitutional provisions and laws for the backward classes
>Submit report to the government on the activities of various systems for the welfare of the backward classes
>to make recommendations for taking steps against atrocities faced by backward classes and to ensure justice
> Examine the demands related to backward status and give suggestions to the government.

14.List out the important functions of the National Minority Commission.

⊙ Evaluate the progress of the social development of the minorities. ⊙ Evaluate the

SURE A PLUS NOTES Std IX SS

Downloaded From: https://textbooksall.blogspot.com/

functioning of the constitutional provisions and laws for the protection of the minorities.
⊙ Submit reports on the issues and crises faced by minorities from time to time.
⊙ Examine the complaints regarding the violation of the rights of minorities and make recommendations for further action.
⊙ Submit suggestions for the upkeep of the protection of minorities.

15.Write the objectives of SC and ST (Prevention of Atrocities) Act, 1989?

§ The act came into force in the year 1989
§ Prevention of atrocities against the SCs and STs
§ Establishing special courts for handling such crimes, and taking steps for their well-being and rehabilitation.
§ Defines the atrocities and crimes committed against the SC and ST sections, prescribes the punishment for those who commit such crimes, and stipulates the process for their rehabilitation.

16. Write the functions of the Scheduled Castes and Scheduled Tribes Commissions?

® Inquire into the complaints regarding the atrocities against the Scheduled Castes and Scheduled Tribes
® Evaluate the effectiveness in the functioning of the constitutional provisions and laws for the welfare of the Scheduled Castes and Tribes
® Coordinate the efforts for the welfare, protection and growth of the Scheduled Castes and Scheduled Tribes
® Submit reports to the governments on the challenges faced by the Scheduled Castes and Scheduled Tribes and the suggestions for their remedies.

17.What are the things suggested by Ambedkar for the upliftment of the backward classes?

➢Lower the cost of higher education
➢ Give special consideration to low-lying communities
➢ Bring communities to equality
➢ Ensure consideration for all.

18. Write the functions of National Commission for Backward Classes?

⁂ Submit report to the government on the activities of various systems for the welfare of the backward classes
⁂ To make recommendations for taking steps against atrocities faced by backward classes and to ensure justice.
⁂ Examine the demands related to backward status and give suggestions to the government.
⁂ Ensure the effective implementation of the constitutional provisions and laws for the backward classes

19.Prepare an analytical note on the role of institutions in 'spread of democracy'

⌘ In our country with vast land area, high population and cultural diversity, it is imperative to address the socio-economic backwardness of various sections of the population.
⌘ This backwardness can be remedied only by ensuring equality of opportunity, social justice and participation as envisioned by the Constitution.
⌘ Democracy is complete only by bringing the socio-economically backward sections into the mainstream of society.

Downloaded From: https://textbooksall.blogspot.com/

⌘ The success or failure of a democratic system of government depends on the participation of the people.
⌘ Constitutional institutions and Non-constitutional institutions play an important role in ensuring the participation of various sections of the people in the political process.

All the Very Best Dear Students
