Her mother was a bit surprised, given that Grace had not expressed any interest in such a doll before.

"What's a Monster High doll?" her mother asked.

"They're cool, Mom. They all have monster names like Frankenstein and Clawdeen Wolf. But I like Draculaura. She has long black hair, pink boots and a pet bat. I love her outfits," replied Grace.

"How do you know about these dolls?" her mother asked. "Maddi told me about them. We watched some of their videos at Maddi's house and we even played a computer game. Mom, Draculaura has her own website!" said Grace.

"What do the dolls do in these videos?" probed her mother.

Be the good girl you always have to be
Conceal, don't feel, don't let them know
Well, now they know.

If everyone turns the other way; if everyone is afraid,
Then open your heart and speak out your mind alone.
If everyone turns away, oh my hapless one,
If as you walk alone on a dark road
No one joins you on your journey,
Then you must crush the thorns in your path
With your bleeding feet and walk ahead alone.

Questions 11 - 14: Read the passage and answer the questions given below. **(4 x 1 = 4)**

Climate change refers to significant, long-term shifts in global temperatures and weather patterns, primarily driven by human activities. The burning of fossil fuels such as coal, oil, and natural gas releases greenhouse gases like carbon dioxide into the atmosphere, intensifying the natural greenhouse effect and leading to global warming. This warming results in melting glaciers, rising sea level, and increased frequency of extreme weather events, including hurricanes, droughts, and heat wave. Additionally, climate change disrupts ecosystems, leading to biodiversity loss and threatening food and water security. It requires a collaborative global effort to reduce the impacts of climate change. To achieve this, we should reduce greenhouse gas emissions, switch to renewable energy sources, and implement sustainable practices across all sectors of the society.

11. What is climate change?
12. How does climate change affect biodiversity?
13. Which among the following is a green house gas?
    a) oxygen
